 War Department,2022-11-15 Originally invented by Brig General John T Thompson in 1918 the Thompson Submachine Gun
 was envisioned as a one man hand held machine gun that would bring an end to WWI s entrenched stalemate The air cooled
 recoil operated magazine fed trench sweeper weighed less than 16 pounds when equipped with a 50 cartridge magazine and
 could be used for both automatic and semi automatic fire Although the weapon debuted after WWI came to an end the
 Thompson was quickly adopted by the Marine Corps FBI and by the general public including by organized crime During the
 Prohibition Era the Chicago Piano or Chicago Typewriter became a mafia favorite due to its high rate of fire and large
 magazine capacity During WWII the Tommy Gun was widely fielded by the U S armed forces with over 1 5 million produced
 by the end of the conflict The main models in production were the M1928A1 M1 and M1A1 Originally published in December
 1941 this basic field manual was standard issue for U S Army personnel It features a chapter on weapon mechanics with
 sections on weapon assembly and disassembly care and cleaning spare parts functioning safety precautions and a primer on
 ammunition It also includes chapters on technique of fire marksmanship from a moving vehicle marksmanship against air and
 ground targets and advice to instructors This high quality reproduction presents the manual in its entirety Although slightly
 reformatted care has been to preserve the integrity of the text 45 Thompson Sub-machine Gun Ian D. Skennerton,2003
