Three-Dimensional Imaging, Visualization, and Display Bahram Javidi, Fumio Okano, Jung-Young Son, 2010-07-15

Here is an up to date examination of recent developments in 3D imaging as well as coverage of the prospects and challenges facing 3D moving picture systems and devices including binocular multi view holographic and image reproduction techniques

3D Video Laurent Lucas, Céline Loscos, Yannick Rémion, 2013-12-04 While 3D vision has existed for many years the use of 3D cameras and video based modeling by the film industry has induced an explosion of interest for 3D acquisition technology 3D content and 3D displays As such 3D video has become one of the new technology trends of this century The chapters in this book cover a large spectrum of areas connected to 3D video which are presented both theoretically and technologically while taking into account both physiological and perceptual aspects Stepping away from traditional 3D vision the authors all currently involved in these areas provide the necessary elements for understanding the underlying computer based science of these technologies They consider applications and perspectives previously unexplored due to technological limitations This book guides the reader through the production process of 3D videos from acquisition through data treatment and representation to 3D diffusion Several types of camera systems are considered multiscopic or multiview which lead to different acquisition modeling and storage rendering solutions The application of these systems is also discussed to illustrate varying performance benefits making this book suitable for students academics and also those involved in the film industry

High-Quality Visual Experience Marta Mrak, Mislav Grgic, Murat Kunt, 2010-09-08 Last few years have seen rapid acceptance of high definition television HDTV technology around the world This technology has been hugely successful in delivering more realistic television experience at home and accurate imaging for professional applications Adoption of high definition continues to grow as consumers demand enhanced features and greater quality of content Following this trend natural evolution of visualisation technologies will be in the direction of fully realistic visual experience and highly precise imaging However using the content of even higher resolution and quality is not straightforward as such videos require significantly higher access bandwidth and more processing power Therefore methods for radical reduction of video bandwidth are crucial for realisation of high visual quality Moreover it is desirable to look into other ways of accessing visual content solution to which lies in innovative schemes for content delivery and consumption This book presents selected chapters covering technologies that will enable greater flexibility in video content representation and allow users to access content from any device and to interact with it

Mladenov,A. Odziejewicz,2013-03-09 As all participants know by now the Bialowieza Summer Workshop has acquired a life of its own The charming venue of the meetings the informal atmosphere the enthusiasm of the participants and the intensity of the scientific interaction have all conspired to make these meetings wonderful learning experiences The XIIth Workshop held from July 1 7 1993 was once again a topical meeting within the general area of Differential Geometric Methods in Physics focusing specifically on Quantization and Infinite dimensional Systems Altogether about fifty participants attended the workshop As before the aim of the workshop was to have a small number of in depth lectures on the main theme and a somewhat larger number of short presentations on related areas while leaving enough free time for private discussions and exchange of ideas Topics treated in the workshop included field theory geometric quantization and symplectic geometry coherent states methods holomorphic representation theory Poisson structures non commutative geometry supersymmetry and quantum groups The editors have the pleasant task of first thanking all the local organizers in particular Dr K Gilewicz for their painstaking efforts in ensuring the smooth running of the meeting and for organizing a delightful array of social events Secondly they would like to record their indebtedness to all the people who have contributed to this volume and to the redoubtable Ms Cindy Parkinson without whose patient typesetting and editing skills the volume could hardly have seen the light of the day 3D Printing at Hospitals and Medical Centers Frank J.
