The psychological aspect of aging in Edward Albee's "Three Tall Women" Deborah De Lorenzo, 2014-02-14 Facharbeit Schule aus dem Jahr 2013 im Fachbereich Didaktik f r das Fach Englisch Literatur Werke Sprache Deutsch Abstract In the course of a human's life a person goes through different physical and psychological stages and as the body becomes older the mind follows and vice versa Already Greek and Roman philosophy discussed negative and positive aspects

of different stages of human life The first theoretical disquisitions on human psychological development were composed as early as in the 18th century During this time Johannes Nikolaus Tetens described human development as a lifelong process including gain and loss and affected by sociocultural aspects a process that therefore can be influenced The Belgian mathematician Adolphe Quételet dealt with the development of skills and collected empirical data on the course of human life He did not base his work only on statistics about physical aspects such as height weight and strength but also and more importantly on psychological variables like emotions and intellectual potential He also covered how historical events influenced aging hence how the psyche and emotional condition of a person influence how old people become see Lang Martin Pinquart *Entwicklungspsychologie Erwachsenenalter* p 14 It is apparent that the interest in the human psyche and its effect on aging as a process were always of scientific concern It is something we face daily Edward Albee's *Three Tall Women* perfectly represents the issue of developmental psychology One protagonist is being portrayed by three versions of herself at different stages of her life and as a result the development of that protagonist becomes clear An array of changes in her behavior and in her way of thinking can be seen The most important point of the protagonist's unfolding just as Johannes Nikolaus Tetens describes lies in the influence of one's social surroundings see Lang Martin Pinquart *Entwicklungspsychologie Erwachsenenalter* p 14 The topic The psychological aspect of aging in Edward Albee's *Three Tall Women* focuses on the protagonist's social development as she gets older In this paper the character of the protagonist will be analyzed and the courses of events in her life which lead her to become the person she turns out to be in the end Following that the most essential themes of the play will be analyzed on the background of psychological aspects But at first there will be a brief section of information on the playwright and the play itself **Edward Albee** Barbara L. Horn, 2003-12-30 This volume documents the life and works of the acclaimed playwright Edward Albee His first four plays were all produced Off Broadway from 1960-1961 creating buzz that he was an up and coming avant garde playwright But his most notable accomplishment came a year later with his first full length play *Who's Afraid of Virginia Woolf?* His plays were linked with the philosophies of the European absurdist Beckett and Ionesco and the American traditional social criticism of Arthur Miller Tennessee Williams and Eugene O'Neill Intended to serve as a quick reference guide and an exhaustive resource this collection includes play synopses and critical overviews production histories and credits and locator suggestions on unpublished archival material and lists of texts anthologies that have published Albee's material The two secondary bibliographies contained within are fully annotated chronologically and alphabetically with the year of publication presenting a fuller sense of Albee's playwriting career *The Playwright's Muse* Joan Herrington, 2013-05-13 August Wilson penned his first play after seeing a man shot to death Horton Foote began writing plays to create parts for himself as an actor Edward Albee faced commercial pressures to modify his scripts and resisted After Wit Margaret Edson swore off playwriting altogether and decided to keep her day job as a kindergarten teacher instead *The Playwright's Muse* presents
