Inspiring air: A history of air-related science Pere Grapí, 2019-07-15 Eudiometers were instruments originally devised for checking the goodness of common air Seeking to be more than just a chronological inventory of eudiometers this book presents a unique retrospective of these fascinating apparatuses from the end of the eighteenth century to the mid nineteenth century By paying particular attention to the experimental procedures involved over the course of the test this book aims to understand and explore how eudiometers function to describe the materials used in making them and the different reagents employed in each eudiometrical test Importantly eudiometers were employed within a variety of spheres including human and animal health gas analysis chemical theory plant and animal physiology atmospheric composition chemical compound composition gas lighting chemical revolution and experimental demonstration Finally this book looks to redress the existing imbalance in the history of chemistry regarding the attention given to theoretical aspects of chemistry in comparison to chemical practice and apparatus The few existing accounts of chemical devices written in the past century have not been sufficiently helpful for the understanding of experimental practice in chemistry Until now no work that deals exclusively with eudiometers and gas analysis from a historical standpoint has been published Thus this book will not only cast new light on the subject but will also contribute to further research on the history of chemical instruments The penny cyclopædia [ed. by G. Christy Tran with Patti Dobbe, 2011-08 I met Christy Tran whom I know as Victoria in 2001 when she became my hairdresser after I had moved from Austin Texas to Amarillo Texas Over the years we visited while she worked to make me presentable to rest of the world During our talks she slowly began sharing the details of her life in Vietnam during the infamous war years I became fascinated with her story Some of her experiences seemed unbelievable however the fervor with which she spoke

told me it was all true She lived a life that only a few people could truly understand She endured the horrors of war and bears witness to the terrible things that human beings can do to one another Yet her story is also one of survival Not only did she survive the war she survived the torturous escape from her homeland as one of the boat people of the 1970s Her story does not end as refugee but it is one of victory and finding a new country to call her own I was intrigued and amazed at my friend s determination and courage in face of fear devastation isolation and hopelessness She has taught me that the problems I face in day to day life can be overcome with faith and fortitude This is Christy s story as she told it to me over the course of three years as she has lived it over the course of 53 years
