

ACCOUNTING

GCE Advanced Level and GCE Advanced Subsidiary Level

Grade thresholds taken for Syllabus 9706 (Accounting) in the October/November 2009 examination.

	maximum mark available	minimum mark required for grade:		
		A	B	E
Component 11	30	24	21	13
Component 12	30	24	21	13
Component 21	90	62	51	27
Component 22	90	64	53	28
Component 31	30	24	22	13
Component 32	30	24	22	13
Component 41	120	86	80	39
Component 42	120	76	69	31

The thresholds (minimum marks) for Grades C and D are normally set by dividing the mark range between the B and the E thresholds into three. For example, if the difference between the B and the E threshold is 24 marks, the C threshold is set 8 marks below the B threshold and the D threshold is set another 8 marks down. If dividing the interval by three results in a fraction of a mark, then the threshold is normally rounded down.

Grade Thresholds are published for all GCE A/AS and IGCSE subjects where a corresponding mark scheme is available.

Threshold For Accounts As Level November 2014:

Switzerland International Monetary Fund. European Dept.,2018-06-18 This Selected Issues paper analyzes key features of corporate taxation in Switzerland The Swiss corporate tax system includes many aspects of a territorial regime is highly attractive for multinational companies and collects non negligible revenues but the status quo is not sustainable The proposed reform would eliminate differences in the tax treatment of foreign and Swiss sourced income Further cantons are expected to lower their corporate income tax CIT rates bringing the combined municipal cantonal and federal tax rate averaged across cantons to about 13.9 percent Costs of lowering the CIT rates would be unequally distributed across cantons and would be costlier for cantons with a large immobile CIT base Related Party Transactions and Corporate Groups Ivan Romashchenko,2020-03-06 In a market environment where economic actors conduct themselves as diligent and conscientious managers the regulation of related party transactions RPTs would be largely irrelevant Unfortunately the corporate reality is far from an ideal world that is innocent of market abuse and corporate fraud It remains necessary to protect minority shareholders from the wrongdoings of majority shareholders and to protect all shareholders from opportunistic managerial behaviour This timely book the first on the subject since implementation of the European Union's EU's revised Shareholders Rights Directive provides in depth analysis of how and to what extent RPTs are covered by existing legal requirements on capital protection and corporate group regulation highlighting experiences and strategies adopted in Germany Poland and the Netherlands as examples for Eastern European countries and in particular Ukraine Beyond his comparative analysis of the current status the author offers recommendations for more effective handling of RPTs investigating such aspects as the following what constitutes a corporate group and how group issues are regulated in the various legal systems what constitutes a conflict of interest originating in ownership and control and what types of such conflicts occur whether RPTs within corporate groups should receive special treatment relative to transactions outside groups combatting corporate raiding most often carried out through illegal seizure of corporate assets approval and disclosure requirements for RPTs and how information about RPTs is disclosed publicly Drawing on resources including legislation case law scholarship and intensive discussions with practicing lawyers from several jurisdictions the author underscores the imperative of establishing limitations and requirements that oblige a company's officers shareholders and other potential related parties to follow certain rules whenever they wish to enter into an RPT As a contribution to the debate about the convergence between EU corporate law and that of major eastern European states the book has no peers Practitioners in both East and West who advise on compliance with regulations for RPTs or represent stakeholders interests against abusive RPTs will ensure appropriate remedies and protection mechanisms for their clients *Social Sciences and Interdisciplinary Behavior* Ford Lumban Gaol,Fonny Hutagalung,Nailya Bagautdinova,Lenar Safiullin,2016-09-19 Social Sciences and Interdisciplinary Behavior contains papers that were originally presented at the 4th International Congress on

Interdisciplinary Behavior and Social Science 2015 ICIBSoS 2015 held 22-23 October 2015 at The Institute of Management Economics and Finance of the Kazan Federal University Kazan Russia and 7-8 November 2015 in Arya Duta Hotel Jakarta Indonesia The contributions deal with various interdisciplinary research topics particularly in the fields of social sciences education economics and arts The papers focus especially on such topics as language cultural studies economics behavior studies political sciences media and communication psychology and human development

The Reinvention of Development Banking in the European Union Daniel Mertens, Matthias Thiemann, Peter Volberding, 2021-01-21 National development banks NDBs have transformed from outdated relics of national industrial policy to central pillars of the European Union's economic project This trend which accelerated after the Financial Crisis of 2007 has led to a proliferation of NDBs with an expanded size and scope However it is surprising that the EU which has championed market oriented governance and strict competition policy has actually advocated for an expansion of NDBs This book therefore asks Why has the EU supported an increased role for NDBs and how can we understand the dynamics between NDBs and European incentives and constraints To answer these questions the contributing authors analyze the formation and evolution of a field of development banking within the EU identifying a new field around an innovative conceptualization of state backed financing for the purposes of policy implementation Yet rather than focusing solely on national development banks the authors instead broaden the focus to the entire ecosystem of the field of development banking which includes political institutions both in Brussels and in the member states financing vehicles such as the Juncker Plan regulatory bodies Directorate General for Competition Directorate General for Economic and Financial Affairs and commercial actors Seven in depth case studies on European NDBs along with three chapters on European level actors detail this field of development banking and answer the questions of when where and how development banking occurs within the EU

Boosting the Enforcement of EU Competition Law at the Domestic Level Anne Looijestijn-Clearie, Catalin S. Rusu, Marc Veenbrink, 2017-05-11 The role of the EU competition law rules in shaping the EU Internal Market can hardly be overstated The EU substantive rules dealing with cartels abuse of dominance and State aid have ensured in the past decades a much desired unity of the law applied in the diverse European markets Yet much of the success of the EU competition law provisions depends on its practical enforcement The proliferation of competition law enforcement especially since 2004 stands testimony in this respect However this has not come without challenges In this context this book aims to critically discuss certain key elements relating to the domestic enforcement of the said rules in order to place the discussion of further boosting this enforcement exercise in the correct context This book aims in this respect to find an answer to the following question to what extent would boosting the domestic enforcement of the EU competition law rules aid the ambition of more forceful better targeted and more resource efficient EU competition law enforcement in the Internal Market Topics such as the following are discussed in the contributions included in this book the sufficiency of the enforcement toolbox of national

competition authorities the interaction between fundamental rights and competition law and the duties of domestic bodies in this context *Federal Register* ,2013-08

Structure-Related Intrinsic Electrical States and Firing Patterns of Neurons With Active Dendrites Sergey M. Korogod,2018-10-18 Activity of the multi functional networked neurons depends on their intrinsic states and bears both cell and network defined features Firing patterns of a neuron are conventionally attributed to spatial temporal organization of inputs received from the network mates via synapses in vast majority dendritic This attribution reflects widespread views of the within cell job sharing such that the main function of the dendrites is to receive signals and deliver them to the axo somatic trigger zone which actually generates the output pattern However these views are now revisited due to finding of active non linear properties of the dendritic membrane practically in neurons of practically all explored types Like soma and axon the dendrites with active membrane are able to generate self maintained propagating depolarizations and thus share intrinsic pattern forming role with the trigger zone Unlike the trigger zone the dendrites have complex geometry which is subject to developmental activity dependent or neurodegenerative changes Structural features of the arborization inevitably impact on electrical states and cooperative behavior of its constituting parts at different levels of organization from sub trees and branches to voltage and ligand gated ion channels populating the dendritic membrane More than two decades of experimental and computer simulation studies have brought numerous phenomenological demonstrations of influence of the dendritic structure on neuronal firing patterns A necessary step forward is to comprehend these findings and build a firm theoretical basis including quantitative relationships between geometrical and electrical characteristics determining intrinsic activity of neurons The articles in this eBook represent progress achieved in a broad circle of laboratories studied various aspects of structure and function of the neuronal dendrites The authors elucidate new details of dendritic mechanisms underlying intrinsic activity patterns in neurons and highlight important questions that remain open in this important domain of cellular and computational neuroscience

Facing Up to Global Warming N.F. Gray,2015-08-18 In this volume Professor N F Gray offers a comprehensive primer on climate change sustainability and how the two concepts are related This book consists of fifteen chapters each treating a specific aspect of the current global crisis including scientific background as well as an up to date appraisal of the issue at hand It covers the reasons behind climate change and the effect it will have on the planet and on the reader directly Gray also presents readers with the means to assess their own environmental impact and details positive individual and community actions to address global warming Climate change global warming and sustainability are phrases that almost everyone has heard whether on the news or around the dinner table The increasing frequency of major events such as droughts severe storms and floods are beginning to make these concepts inescapable and being fully informed is an absolute necessity for students and indeed for us all Nick Gray PhD ScD is a founding member of the Environmental Sciences Unit 1979 at Trinity College Dublin which was the first center for postgraduate research and training in environmental science and technology in Ireland He has written a

number of books and over 150 research papers and book chapters and currently serves as the Director of the Trinity Centre for the Environment

Detecting, Modelling and Responding to Effusive Eruptions A.J.L. Harris, T. De Groeve, F. Garel, S.A. Carn, 2016-06-28 For effusive volcanoes in resource poor regions there is a pressing need for a crisis response chain bridging the global scientific community to allow provision of standard products for timely humanitarian response As a first step in attaining this need this Special Publication provides a complete directory of current operational capabilities for monitoring effusive eruptions This volume also reviews the state of the art in terms of satellite based volcano hot spot tracking and lava flow simulation These capabilities are demonstrated using case studies taken from well known effusive events that have occurred worldwide over the last two decades at volcanoes such as Piton de la Fournaise Etna Stromboli and Kilauea We also provide case type response models implemented at the same volcanoes as well as the results of a community wide drill used to test a fully integrated response focused on an operational hazard GIS Finally the objectives and recommendations of the Risk Evaluation Detection and Simulation during Effusive Eruption Disasters working group are laid out in a statement of community needs by its members

Synaptic Plasticity for Neuromorphic Systems Christian Mayr, Sadique Sheik, Chiara Bartolozzi, Elisabetta Chicca, 2016-06-26 One of the most striking properties of biological systems is their ability to learn and adapt to ever changing environmental conditions tasks and stimuli It emerges from a number of different forms of plasticity that change the properties of the computing substrate mainly acting on the modification of the strength of synaptic connections that gate the flow of information across neurons Plasticity is an essential ingredient for building artificial autonomous cognitive agents that can learn to reliably and meaningfully interact with the real world For this reason the neuromorphic community at large has put substantial effort in the design of different forms of plasticity and in putting them to practical use These plasticity forms comprise among others Short Term Depression and Facilitation Homeostasis Spike Frequency Adaptation and diverse forms of Hebbian learning e g Spike Timing Dependent Plasticity This special research topic collects the most advanced developments in the design of the diverse forms of plasticity from the single circuit to the system level as well as their exploitation in the implementation of cognitive systems
