Social Research and Disability Ciaran Burke, Bronagh Byrne, 2020-12-29 Social Research and Disability argues that the contemporary rules of sociological methods outlined in numerous research methods texts make a number of assumptions concerning the researcher including ambulant sight hearing and speech In short the disabled researcher is not considered when outlining the requirements of particular methods Drawing upon these considerations the volume emphasizes how disabled researchers negotiate the empirical process in light of disability whilst retaining the scientific rigour of the method It also considers the negative consequences arising from disabled researchers attempts at passing and the benefits that can emerge from a reflexive approach to method This innovative and original text will for the first time bring together research active academics who identify as being disabled to consider experiences of being disabled within a largely ableist academy as well as strategies employed and issues faced when conducting empirical research The driving force of this volume is to provide the blueprints for bringing how we conduct social research to the same standards and vision as how the social world is understood multi faceted and intersectional To this end this edited collection advocates for a sociological future that values the presence of disabled researchers and normalises research methods that are inclusive and accessible The interdisciplinary focus of Social Research and Disability offers a uniquely broad primary market This volume will be of interest not only to the student market but also to established academics within the social sciences

Literature ,2003-10 **Prevención de la violencia interpersonal en la infancia y la adolescencia** Virginia Sánchez Jiménez,2019-03-14 Los esfuerzos realizados por la comunidad científica internacional y los organismos gubernamentales para erradicar los fenómenos de agresión interpersonal en la infancia y la adolescencia en las últimas décadas han sido muy significativos. Estos esfuerzos se han concentrado no solo en el desarrollo de investigaciones cada vez más ricas, diversas y complejas que acompañadas de un gran rigor metodológico han permitido describir la naturaleza de las diferentes manifestaciones agresivas entre iguales y sus factores asociados sino también en el desarrollo de propuestas psicoeducativas de prevención e intervención. A este respecto en los últimos años se ha generado un movimiento científico y social muy importante que ha subrayado la necesidad de probar la eficacia de las intervenciones de identificar su mayor o menor impacto en determinadas poblaciones así como las circunstancias en las que estos programas resultan más o menos eficaces para prevenir la violencia. En esta obra se recoge el estado del arte de la prevención de la violencia interpersonal en la infancia y la adolescencia basada en la evidencia. Se abordan fenómenos como la agresión interpersonal en la educación infantil, el bullying y el cyberbullying entre iguales, los fenómenos agresivos vinculados al cortejo y las relaciones de pareja adolescente así como el bullying y el rechazo a poblaciones diversas como el colectivo LGTBQ y los y las estudiantes con diversidad funcional. Autores de reconocido prestigio han recopilado de forma sistemática en esta obra las propuestas psicoeducativas que han demostrado su eficacia y que las caracteriza, qué contenidos abordan y qué impacto real tienen en la vida de los niños y niñas. Se trata por tanto de un libro de gran utilidad para la actividad docente, investigadora y profesional centrada en el análisis y mejora de las relaciones interpersonales a estas edades.
