

TI-84 Plus Calculator

Overview of Keys

The functions in this keypad become active when the $\square$ key is pressed. For example, to access the unit menu, press $\square$ $\square$. In this mode, this selection may be denoted as $\square$ $\square$ $\square$.

The alpha characters in green become active when the $\square$ key is pressed. For example, to access the character "C" press $\square$ $\square$.

General Info & Basics

Turning the Calculator On & Off

- To turn the calculator on, press $\square$.
- To turn the calculator off, press $\square$ $\square$.
- If the calculator is on but not used for about five minutes, it will automatically be powered down. Pressing $\square$ will turn the calculator on, and the screen will return exactly as it was before it was powered down.
- Turning the calculator off by pressing $\square$ $\square$ shows any errors but does not clear settings and memory contents.

Adjusting Contrast

- The TI-84 Plus has 40 contrast settings. To change contrast, press $\square$ and hold down $\square$ or $\square$. As you change the contrast, a number from 0 through 9 appears in the top-right corner; each number corresponds to four settings.

Choosing Commands

- Many of the more advanced calculations that are used with the TI-84 Plus are located in various menus.
- To access a menu, select it with the associated function key and then navigate through the menu using the arrows.
- Many menus have submenus. To access a particular submenu, use the left and right arrows $\square$ $\square$.
- To select a command from a menu, enter the number or letter of the command or navigate using the arrows and press $\square$.
- You can also choose commands and operations using the calculator's catalog. Access the catalog by pressing $\square$ $\square$ $\square$.

Replacing Batteries

- The calculator uses four AAA batteries and one lithium battery. When the batteries in the calculator need to be replaced, a message displays on the screen. This message may last up to 1-2 weeks, depending on menu features. The calculator may not be able to download applications while the batteries are below a usable level.
- To replace the lithium battery, remove the cover from the lithium battery cover and insert the battery with the + side facing up. Replace the cover by screwing it back in place. Replacing both the AAA batteries and lithium battery at the same time is not recommended.

Setting Modes

Mode settings interpret how the TI-84 Plus displays and determines numbers and graphs. To change modes, press $\square$. Then use the arrow keys $\square$ $\square$ $\square$ and press $\square$ when the desired setting is highlighted.

- Normal notation:** "Normal" displays numerical expressions in standard form. "Sci" displays numerical expressions in scientific notation, using an "E" to display the power of 10. "Eng" displays numerical expressions in engineering notation, which is similar to scientific notation but allows three digits before the decimal point.
- Number of decimal places:** "Float" displays up to 10 digits after a decimal point (up to when the decimal is truncated). The numbers 0 through 9 display that particular number of digits to the right of the decimal (including trailing zeros). This applies to answers displayed on the home screen, coordinates on a graph, coefficients in regression equations, and calculated results under various other modes.
- Unit of angle measures:** "Radian" interprets angle values as radians, and "Degree" interprets angle values as degrees. This is used primarily with trigonometric functions and polar and rectangular coordinates.
- Type of graphings:** "Func" is used when graphing functions where Y is a function of X . "Par" is used when graphing parametric functions where X and Y are functions of T . "Pol" is used when graphing functions where r is a function of θ . "Seq" is used when graphing sequences.
- Graph point displays:** "Connected" shows a line that connects each point calculated for each function. "Dot" plots each point calculated for each function.
- Graph window:** "Horizontal" shows one function completely before any other function is shown. "Normal" shows values for all functions for a single value of X , then shows values for all functions for the next value of X , etc.
- Complex number activation:** "Real" does not display complex numbers when complex numbers are entered. "a+bi" and "re^i\theta" display complex numbers in the corresponding form as complex numbers arise in calculations.
- Screen displays:** "Full" uses the entire screen as a display. "Mosaic" displays graphs on the top half of the screen and the home screen or other editor on the bottom half of the screen. "G-Y" displays graphs on the left half of the screen and the corresponding table on the right half.

Screen operating systems also include modes for output printing, fraction format and decimal output, advanced graph format, statistical diagnostics, and clock information.

Display Cursors

There are a variety of cursors that appear on the TI-84 Plus screen. How the cursor appears affects how the calculator interprets the next key pressed.

- Entry cursor (I):** This is the default cursor. When this cursor is displayed, any entering character is unambiguous.
- Invert cursor (L):** This is activated by pressing $\square$ $\square$. When this cursor is displayed, a character is inserted at the cursor location.
- Normal cursor (I):** This is activated by pressing $\square$. When this cursor is displayed, the functions listed in blue on the keyboard are activated when pressed.
- Alpha cursor (A):** This is activated by pressing $\square$. When this cursor is displayed, the characters listed in green on the keyboard are activated when pressed. **NOTE:** This cursor also activates the alpha command when $\square$ is pressed. The alpha cursor may be locked by pressing $\square$ $\square$ $\square$.
- Full cursor (B):** This indicates that the maximum number of characters have been entered or that the memory is full. **NOTE:** Other cursors may be displayed in graphing format and other applications.
