

Multi Step Addition Word Problems

Donald went to New Zealand for a holiday with his parents. At Taupo, there was an exciting prawn fishing center. His father and he bought the passes for NZD 25 each and went fishing for prawn. They decided to have a competition amongst themselves and noted their prawn catch hourly to see who caught more.

1. In the first hour, Donald caught 17 and his father caught 22. How many prawns did they catch in the first hour altogether?

2. In the second hour, Donald caught 23 and his father caught 12. How many prawns did they catch in the second hour altogether?

3. In the third hour, Donald caught 24 and his father caught 27. How many prawns did they catch in the third hour altogether?

4. In the fourth hour, Donald caught 20 and his father caught 20. How many prawns did they catch in the fourth hour altogether?

5. How many prawns did they catch each in four hours and how many prawns did they catch altogether?

Math Problem Solving in Action Nicki Newton, 2017-02-10. In this new book from popular math consultant and bestselling author Dr Nicki Newton you will learn how to help students become more effective and confident problem solvers. Problem solving is a necessary skill for the 21st century but can be overwhelming for both teachers and students. Dr Newton shows how to make word problems more engaging and relatable, how to scaffold them and help students with math language, how to implement collaborative groups for problem solving, how to assess student progress and much more. Topics include: Incorporating problem solving throughout the math block; connecting problems to students' real lives and teaching students to persevere; Unpacking word problems across the curriculum and making them more comprehensible to students; Scaffolding word problems so that students can organize all the pieces in doable ways; Helping students navigate the complex language in a word problem; Showing students how to reason about model and discuss word problems; Using fun mini lessons to engage students in the premise of a word problem; Implementing collaborative structures such as math literature circles to engage students in problem solving; Getting the whole school involved in a problem solving challenge to promote schoolwide effort and engagement; and Incorporating assessment to see where students are and help them get to the next level. Each chapter offers examples, charts and tools that you can use immediately. The book also features an action plan.

Common Core Standards in Diverse Classrooms Jeff Zwiers, Susan O'Hara, Robert Henry Pritchard, 2014 The Common Core State Standards require students to do more with knowledge and language than ever before. Rather than be mere consumers of knowledge, students must now become creators, critics, and communicators of ideas across disciplines. Yet in order to take on these new and exciting roles, many students need daily teaching with an extra emphasis on accelerating their academic communication skills. *Common Core Standards in Diverse Classrooms: Essential Practices for Developing Academic Language and Disciplinary Literacy* describes seven research-based teaching practices for developing complex language and literacy skills across grade levels and disciplines using complex texts, fortifying complex output, fostering academic interaction, clarifying complex language, modeling guiding and designing instruction. Most important, you will find clear descriptions and examples of how these essential practices can and should be woven together in real lessons. The book clarifies how to support the learning of complex language that students need for reaching Common Core and other standards. Provides practical ways to realize the instructional shifts needed with the implementation of new standards in diverse classrooms. Includes frameworks and descriptions on how to develop students' complex language speaking and writing. Helps maximize strategies and tools for building system-wide capacity for sustained growth in the practices. *Common Core Standards in Diverse Classrooms* is a concise guide for helping us improve our practices to strengthen two vital pillars that support student learning: academic language and disciplinary literacy.

Curriculum Development for Students with Mild Disabilities Carroll J. Jones, 2010 Many teachers of students with mild disabilities experience difficulty writing IEPs and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks goals and benchmarks, this resource assists in preparing IEPs including the new process of identification of children with disabilities through their responses to intervention (RTI). An additional focus is on the impact of federal laws IDEA and NCLB on the curriculum and assessment in

schools today The book has been reorganized into ten chapters including historical perspectives early childhood special education curricula oral expression curricula reading and listening curricula written expression curricula mathematics curricula educational technology curricula K 12 social and self competence curricula science curricula and evaluation reports case studies Appendix The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs using age appropriate and developmentally appropriate teaching and assessment materials Chapter summaries included for review purposes also serve as selective and motivational reading With special education teachers in short supply and the demands on their time so great this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process determining what skills students need to move effectively to the next level
