Handbook of Integrated Care Volker Amelung, Viktoria Stein, Esther Suter, Nicholas Goodwin, Ran Balicer, Anna-Sophia Beese, 2025-11-03 This handbook shares profound insights into the main principles and concepts of integrated care. It offers a multi-disciplinary perspective with a focus on patient orientation, efficiency and quality by applying widely recognized management approaches to the field of healthcare. The handbook also highlights international best practices and shows how integrated care can work in various health systems. In the majority of health systems around the world, the delivery of healthcare and social care is characterised by fragmentation and complexity. Consequently, much of the recent international discussion in the fields of health policy and health management has focused on the topic of integrated care. Integrated care acknowledges the complexity of patients' needs and aims to meet them by taking into account both health and social care aspects. Changing and improving processes in a coordinated way is at the heart of this approach. The third edition offers new chapters on people-centredness, complexity theories and evaluation methods, additional management tools and a wealth of experiences from different countries and localities. It is essential reading both for health policymakers seeking inspiration for legislation and for practitioners involved in the management of public health services who want to learn from good practice.

Pursuing quality education in Physical and Rehabilitation Medicine Francesca Gimigliano, Maria Gabriella Ceravolo, Jorge Lains, 2023-08-15 High quality rehabilitation care represents a constitutive element of health systems worldwide. The harmonization of staff education both at the undergraduate and postgraduate level is a key element for ensuring the highest standard of rehabilitation care. International bodies like the UEMS Board for Physical and Rehabilitation Medicine (PRM) or the International Society for PRM have already delivered regulatory documents setting standards in postgraduate PRM education. The implementation of such rules is to be validated worldwide with special attention to low and middle income countries. This Research Topic aims to stimulate awareness in the scientific community, especially for those involved in postgraduate education and policy making decisions. It will highlight the need for developing competency-based education as a powerful mechanism to align education and training with health system priorities. This holds particular value for resource-limited countries where the knowledge and skills of rehabilitation doctors need to reflect not only the population's health profile but also the strengths and weaknesses, e.g. workforce gaps and maldistributions of the health system. This goal

can be achieved through sharing experiences between those who have engaged themselves in the process of program development curriculum design and competency based education in rehabilitation Over the last 25 years the number of papers addressing the issue of residency education in PRM has exponentially increased testifying the interest towards the role of rehabilitation and more specifically of the PRM doctors as leaders of the rehabilitation team MYCDCGP - Clinical Practice Guidelines - Management of Dengue Fever in Children Bahagian Kawalan Penyakit, Kementerian Kesihatan Malaysia, Improving the usability and impact of WHO guidelines World Health Organization, 2022-12-08 The WHO Department of Quality Assurance Norms and Standards QNS Design Lab located in the Product Design and Impact PDI Unit of QNS in collaboration with Monash University's Design Health Collab conducted their first co design workshop on 7 April 2022 The objective of this collaboration is to understand how improving the design of guidelines can improve their usability and impact The workshop aimed to investigate how WHO guidelines can be designed in the future to be more accessible to the people and communities who use them This report provides a synthesis of insights generated by the co design workshop

Systems Thinking Analyses for Health Policy and Systems Development Jo. M. Martins, Indra Pathmanathan, David T. Tan, Shiang Cheng Lim, Pascale Allotey, 2021-08-26 Health systems are fluid and their components are interdependent in complex ways Policymakers academics and students continually endeavour to understand how to manage health systems to improve the health of populations However previous scholarship has often failed to engage with the intersections and interactions of health with a multitude of other systems and determinants This book ambitiously takes on the challenge of presenting health systems as a coherent whole by applying a systems thinking lens It focuses on Malaysia as a case study to demonstrate the evolution of a health system from a low income developing status to one of the most resilient health systems today A rich collaboration of multidisciplinary academics working with policymakers who were at the coalface of decision making and practitioners with decades of experience provides a candid analysis of what worked and what did not The result is an engaging informative and thought provoking
