

This I Believe

Traditionally, creeds are communal texts read and repeated in worship to remind the faithful of common beliefs. Religious historian Jaroslav Pelikan describes a moment in the spiritual development of a people — speaking of the Massai of Africa — where they can no longer repeat the prayers and creeds of their teachers but must find their own words for their own context. In many ways, the same is true of college students moving away from family, neighborhood, and hometown, and trying to find beliefs and a voice that is truly their own.

Tell a story: Be specific. Take your belief out of the ether and ground it in the events of your life. Consider moments when belief was formed or tested or changed. Think of your own experience, work, and family, and tell of the things you know that no one else does. Your story need not be heart-warming or gut-wrenching — it can even be funny — but it should be *real*. Make sure your story ties to the essence of your daily life philosophy and the shaping of your beliefs.

Be brief: Your statement should be between 350 and 500 words. That's about three minutes when read aloud at your natural pace.

Name your belief: If you can't name it in a sentence or two, your essay might not be about belief. Also, rather than writing a list, consider focusing on one core belief, because three minutes is a very short time.

Be positive: Please avoid preaching or editorializing. Share what you do believe, not what you don't believe. Avoid speaking in the editorial "we." Make your essay about you; speak in the first person. Avoid statements of religious dogma, preaching, or editorializing.

Be personal: Write in words and phrases that are comfortable for you to speak. Try reading your essay aloud to yourself several times, and each time edit it and simplify it until you find the words, tone, and story that truly echo your belief and the way you speak.

Please also remember to:

- Include appropriate background information.
- Have a clear belief in which you have a solid position.
- Acknowledge opposing views and refute them.

Lean Safety Robert Hafey, 2017-07-27 While worker safety is often touted as a companys first priority more often than not safety activity is driven by compliance to legislation rather than any safety improvement initiative Lean takes a proactive approach it is not contingent on legislation A serious Lean effort will tear apart an old

inefficient entitlement riddled culture and *CLASH!* Sandra Vavra, Sharon L. Spencer, 2011-09-01 This book offers ideas that secondary teachers university content faculty and teacher educators can use to challenge traditional literacy practices and demonstrate creative innovative ways of incorporating new literacies into the classroom all within a strong theoretical framework Teachers are trying to catch up to the new challenges of the twenty first century It is a superheroic feat that must be achieved if education is to stay relevant and viable There is a lot of zip bam whap and wow in the fast paced social networking technological world but not so much in the often laboriously slow paced educational world Where is the balance How do teachers and students learn together since one group has seasoned wisdom with limited technological know how and the other uses all the cool new tools but not in the service of learning These are some important issues to consider in finding the balance in an unstable fast moving ever changing world This book is practical and useful to literacy teachers teacher educators and university faculty by bringing together the expertise of composition rhetoric researchers and writers literacy specialists technology specialists and teachers who are on the cutting edge of new literacies The Perfect Norm Sandra Vavra, Sharon L. Spencer, 2009-02-01 Our goal in writing this book was to validate teachers for strong efforts in their life s work We often observe teachers frustrations with what they perceive to be a multitude of different hot topics in education that they must attend to now but which they expect to come and go like the last hot topics So we wanted to help readers see similarities between many of these hot topics differentiation multiple intelligences culturally responsive teaching brain friendly strategies authentic assessment and ethical classroom management which we feel are not flashes in the pan And we trust that serious practitioners will not oversimplify the findings of neuroscientists and their application to education Reading studies and books by scientists a number of which are user friendly can help ensure that teachers separate the hype from credible information We have seen this professionally judicious approach in the work of graduate students Kolinski 2007 in adopting brain friendly strategies We have intentionally packed both theoretical research based and practical information in this book because professional educators want to know why they should use certain approaches models and strategies In turn as professionals we should be able to explain why we teach the way we do not to justify but to educate others about our knowledge based reflective decision making processes and the impact on student learning Thus it is important to read Chapter 1 because it lays a foundation Each succeeding chapter 2 6 has unique and compelling twists and turns chock full of ideas to use or to adapt It is possible to gain lots of ideas processes and strategies from reading and implementing or adapting even one of the unit chapters or a part of it While some of the units are explicitly about literacy others focus on content using reading writing speaking and listening as critical in the learning process Thus literacy skills are reinforced and strengthened Additionally some of our colleagues and public school partners have given us feedback that they wanted to implement some of the units and activities themselves So feel free to use this book for self exploration and professional development **Writing Instruction for Success in College and in the Workplace** Charles A. MacArthur, Zoi A.

Philippakos,2023-12 This book describes an innovative evidence based method for preparing students for the demands of college writing called Supporting Strategic Writers SSW The goal of SSW is to help students become independent learners who understand the value of strategies and can apply them flexibly in future courses and the workplace The text provides genre based strategies for rhetorical analysis planning evaluation and revision critical reading of sources and synthesis of sources that are part of college composition and applicable across contexts and course assignments Equally important to the SSW approach is that students learn metacognitive strategies for goal setting task management progress monitoring and reflection Instructional methods include discussion of model essays think aloud modeling of strategies collaborative writing peer review and self evaluation and reflective journaling Book Features Integrates three critical components strategies for critical reading and writing metacognitive strategies to help students take control of their learning and pedagogical strategies Provides research based approaches for teaching developmental writing courses first year composition summer bridge programs and first year seminars Offers thorough explanations of the strategies and instructional methods with practical examples and support materials for instructors Based on two years of design research and three experimental studies which found significant positive effects on writing quality and motivation with college students in developmental writing courses
