Thomson Tv Manual:

Multiskilling for Television Production Peter Ward, Alan Bermingham, Chris Wherry, 2000-05-22 Written by television trainers who run their own courses on Multiskilling this book offers a comprehensive introduction to the broad range of skills and technical knowledge required in this industry It details all the essential information you need to know acting as an on the job reference source for everyday use For many broadcasting technicians one of the biggest challenges in recent years has been the transition from a career working in a solo core skill such as camerawork or audio to acquiring the experience and expertise of a range of production jobs Many people are expected to work in a number of crafts and to equip themselves with a much wider range of television techniques than had been customary in the past Multiskilling has become an integral part of television culture requiring that new entrants are competent in several specialist production skills Multiskilling for Television Production concentrates on the techniques associated with news and magazine programme production where most technical operators are usually employed but most techniques are shared across the whole spectrum of television and film making Anyone baffled by the range and scope of skills to be mastered will find this book invaluable **Catalog of Copyright**

Expedition and Wilderness Medicine Gregory H. Bledsoe, Michael J. Manyak, David A. Townes, 2008-11-03

With an increase in visits to remote and dangerous locations around the world the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased

Medical personnel working in or near such locations are not always explicitly trained in the management of unique

environmental injuries such as high altitude sickness the bends lightning strikes frostbite acute dehydration venomous stings

and bites and tropical diseases Many health care professionals seek training in the specialty of wilderness medicine to cope

with the health risks faced when far removed from professional care resources and the American College of Emergency

Medicine has recently mandated that a minimum level of proficiency needs to be exhibited by all ER physicians in this

discipline This book covers everything a prospective field physician or medical consultant needs to prepare for when

beginning an expedition and explains how to treat a variety of conditions in a concise clinically oriented format *Message*
