Second Class No Longer Phillip L. Beukema, 2023-10-19 No one could have predicted thirty years ago that online learning would become such a key facet of our educational landscape in nearly every corner of the world Online teaching and learning have evolved rapidly and far more widely than imaginable accompanied by huge impacts on business society and our entire educational enterprise Drawing on his extensive experience in online teaching at both the graduate and undergraduate level as well as his 25 years in higher ed administration the author paints a global picture of the evolution of online education He describes how one country after another has witnessed the astonishing growth of online degrees and microcredentials of all kinds Along the way he dispels the myths and misperceptions that have grown up around online learning With incisive analysis built on solid data the author demonstrates that online programs are no longer regarded as second class but in fact are fully in the mainstream of higher education Not only that but he predicts that by 2030 they will become the gold standard by which the more traditional degrees will be judged
