Handbook of Research on Creating Spaces for African Epistemologies in the Inclusive Education Discourse Maguvhe, Mbulaheni Obert, Masuku, Mfundo Mandla, 2021-12-31 Students with disabilities who are not able to perform to the best of their abilities often find themselves learning in inaccessible environments and subjected to increased stress levels due to the haphazard provisioning of education characterized by physical communicative and unsuitable teaching and learning approaches Very often this is a result of various shortcomings including unfair assessment practices Misconceptions

and a lack of knowledge with regard to the implementation of inclusive education detract from the successful admission of students with disabilities and their retention and active participation. The Handbook of Research on Creating Spaces for African Epistemologies in the Inclusive Education Discourse explores the concept of inclusive education in an African context. It advocates for the monitoring and evaluation of inclusive education and proposes interventions where reasonable accommodation or lack of accessibility is a reason for students with disabilities to not benefit from this system. Covering topics such as barriers to learning, rural schools, and student support, this major reference work is an essential resource for administrators, advocates for students with disabilities, policymakers, researchers, pre-service teachers, educators, academicians, and students.

Reconceptualising education support services in South Africa Johnnie Hay, Macalane J. Malindi, Thabo Makhalemele, 2022-02-10. Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development. This book focuses on the different levels of support provided in South African education from School based Support Teams to District based Support Teams through to special and full service schools and how these could be reconceptualised to provide improved support to learners and teachers. Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education.

A scholarly contribution to educational praxis M.A. Mokoena, J.M. (Ona) Janse van Rensburg, M. Erasmus, E. Mentz, C.B. Zulu, A. Cronje, E.K. Materechera, W.T. Dudu, A.T. Kanyimba, S.P. Raath, C. Kruger, A. Loubser, A.E. Pienaar, A. Klopper, S. Ellis, N.T. Petersen, J. de Beer, J. Varughese, A. Seugnet Blignaut, C. Els, 2016-12-31. This publication contains original research targeting scientific specialists in the field of education through research endeavours grounded on a philosophical basis as well as being embedded in the empirical. The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework. The latter forms a firm basis for the application of sound empiricism. The content of this book adds to the body of scholarly knowledge in education. In his evaluation of the book, Acting Executive Dean, Faculty of Education and Training, Professor Akpovire Oduaran made the following remarks: To a large extent, the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment. So then what the reader is offered in this volume is the articulation of ideas that have been interrogated, structured, and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World. Yet what makes this book so welcome, relevant, and timely is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature.
