Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies

Elements of Architecture Mikkel Bille, Tim Flohr Sorensen, 2016-02-26 Elements of Architecture explores new ways of engaging architecture in archaeology It conceives of architecture both as the physical evidence of past societies and as

existing beyond the physical environment considering how people in the past have not just dwelled in buildings but have existed within them The book engages with the meeting point between these two perspectives For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things to understand humans they must also address the performances as well as temporal and affective impacts of these material remains The contributions in this volume investigate the way time performance and movement both physically and emotionally are central aspects of understanding architectural assemblages It is a book about the constellations of people places and things that emerge and dissolve as affective mobile performative and temporal engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human Elements of Architecture elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies
