Overview of Keys

The functions in blue become active when the **2ND** key is pressed. For example, to access the list menu, press **2ND** **STAT**. In this guide, this selection may be denoted as **2ND** **[STAT]**.

The alpha characters in green become active when the **ALPHA** key is pressed. For example, to access the character "V," press **ALPHA** **[V]**.

General Info & Basics

Turning the Calculator On & Off

- To turn the calculator on, press **2ND** **ON**.
- To turn the calculator off, press **2ND** **OFF**.
- If the calculator is on but not used for about five minutes, it will automatically be powered down. Pressing **2ND** **ON** will turn the calculator on, and the screen will return exactly as it was before it was powered down.
- Turning the calculator off by pressing **2ND** **OFF** clears any errors but does not clear settings and memory contents.

Adjusting Contrast

- The TI-84 Plus has 40 contrast settings. To change contrast, press **2ND** **CONTRAST** and hold down or tap **↑** or **↓**. As you change the contrast, a number from 0 through 9 appears in the top-right corner; each number corresponds to four settings.

Choosing Commands

- Many of the more advanced calculations that are used with the TI-84 Plus are located in various menus.
- To access a menu, select it with the associated function key and then navigate through the menu using the arrows.
- Many menus have submenus. To access a particular submenu, use the left and right arrows (**←**, **→**).
- To select a command from a menu, enter the number or letter of the command or navigate using the arrows and press **ENTER**.
- You can also choose commands and operations using the calculator's catalog. Access the catalog by pressing **2ND** **[CATALOG]**.

Replacing Batteries

- The calculator uses four AAA batteries and one lithium battery. When the batteries in the calculator need to be replaced, a message displays on the screen. This message may last up to 1-2 weeks, depending on many factors. The calculator may not be able to download applications when the batteries are below a usable level.
- To replace the lithium battery, remove the screw from the lithium battery cover and install the battery with the + side facing up. Replace the cover by screwing it back in place. Replacing both the AAA batteries and lithium battery at the same time is not recommended.

Setting Modes

Mode settings interpret how the TI-84 Plus displays and determines numbers and graphs. To change modes, press **MODE**, then use the arrow keys (**←**, **→**, **↑**, **↓**) and press **ENTER** when the desired setting is highlighted.

- Numeric notation:** "Normal" displays numerical expressions in standard form. "Sci" displays numerical expressions in scientific notation, using an "E" to display the power of 10. "Eng" displays numerical expressions in engineering notation, which is similar to scientific notation but allows more digits before the decimal point.
- Number of decimal places:** "Float" displays up to 10 digits after a decimal point (up to when the decimal terminates). The numbers 0 through 9 display that particular number of digits to the right of the decimal (including trailing zeros). This applies to answers displayed on the home screen, coordinates on a graph, coefficients in regression equations, and calculated results under various other menus.
- Unit of angle measure:** "Radian" interprets angle values as radians, and "Degree" interprets angle values as degrees. This is used primarily with trigonometric functions and polar and rectangular coordinates.
- Type of graphing:** "Func" is used when graphing functions where Y is a function of X. "Par" is used when graphing parametric functions where X and Y are functions of T. "Pol" is used when graphing functions where r is a function of θ . "Seq" is used when graphing sequences.
- Graph point display:** "Connected" draws a line that connects each point calculated for each function. "Dot" plots each point calculated for each function.
- Graph order:** "Sequential" draws one function completely before any other function is drawn. "Simul" draws values for all functions for a single value of X, then draws values for all functions for the next value of X, etc.
- Complex number activation:** "Real" does not display complex numbers unless complex numbers are entered. "a+bi" and "re^i θ " display complex numbers in the corresponding form as complex numbers arise in calculations.
- Screen display:** "Full" uses the entire screen as a display. "Horiz" displays graphs on the top half of the screen and the home screen or other editor on the bottom half of the screen. "G-T" displays graphs on the left half of the screen and the corresponding table on the right half.

Newer operating systems also include modes for output printing, fraction format and decimal outputs, advanced graph formats, statistical diagnostics, and clock information.

Display Cursors

There are a variety of cursors that appear on the TI-84 Plus screen. How the cursor appears affects how the calculator interprets the next key pressed.

- Entry cursor (■):** This is the default cursor. When this cursor is displayed, any existing character is overwritten.
 - Insert cursor (■):** This is accessed by pressing **2ND** **[INS]**. When this cursor is displayed, a character is inserted at the cursor location.
 - Second cursor (■):** This is accessed by pressing **2ND**. When this cursor is displayed, the functions listed in blue on the keyboard are activated when pressed.
 - Alpha cursor (■):** This is accessed by pressing **ALPHA**. When this cursor is displayed, the characters listed in green on the keyboard are activated when pressed. **NOTE:** This cursor also activates the solve command when **2ND** **[SOLVE]** is pressed. The alpha cursor may be locked by pressing **2ND** **[4-LOCK]**.
 - Full cursor (■):** This indicates that the maximum number of characters have been entered or that the memory is full.
- NOTE:** Other cursors may be displayed in graphing menus and other applications.

Teaching to the Math Common Core State Standards F. D. Rivera,2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I

portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers *Book Bytes* Cris Popenoe,1984
