Managing Innovation John Ettlie, 2007-06-07

Managing Innovation: New Technology, New Products, and New Services in a Global Economy, 2nd Edition, is devoted to providing a better understanding and better management of all of the causes and consequences of change that have technological implications in and around our global organizations. This text is a unique

original contribution and represents a significant alternative to the collection of chapters written by others. The second edition has new cases with a few classics from the first edition that have been retained in response to reader feedback. The key subjects that are included have been significantly updated and treated in greater depth. The number of chapters has been reduced from 12 to 10 so it is easy to adapt to almost any course or training on the subject in any discipline or to any audience. This exceptionally informative book provides a broad perspective on how technological change can be effectively managed in modern organizations. The text explains the conceptual frameworks supported by new and original case studies for start up companies like Askmen.com, the complex challenges of managing international technology based companies like NexPress, a joint venture of Kodak and Heidelberg in the digital printing industry and corporate sustainability using innovative new product technologies illustrated by the case of Evinrude's launch of the E-tec outboard motor. John E. Ettlie's three decades in the field of innovation as an instructor and researcher bring an exceptional perspective to this subject. His text is unique in its discussion of how technology has transformed the service sector. Few books on technology make the distinction between new offerings in manufacturing and the service sector which is emphasized in this text.

Managing Innovation, 2001 **Serendipitous and Strategic**

Innovation Shantha Liyanage, 2005-12-30 Innovation is a time consuming process that involves invention as a beginning and a marketable service or product as an end But innovation itself once concluded is not necessarily a constructive act as some innovations yield positive and some negative results The way we recognize and develop innovation so often a serendipitous and almost invisible act in its beginning is thus a matter of primary importance in today's world where new thoughts and products play such a crucial role in economies across the globe Nowhere is the general support structure required for success in innovation more starkly illuminated than in the fields of science and medicine where human well being is so manifestly at stake In this work which draws together the perspectives of a multidisciplinary group of professionals medical doctors innovation policy analysts and academics in business management Shantha Liyanage and his colleagues provide a

thorough examination of the technology innovation process and display its critical links with organizational functions so the innovative capacities of organizations can be better prepared to meet the rapid changes of our age European Perspectives on Innovation Management Rob Dekkers, Laure Morel, 2023-12-30 This book covers European perspectives on innovation management including new product and service development due to the inherent variety of socio economic perspectives and institutional settings in Europe The numerous settings and differing perspectives explored in the chapters exemplify diversity which ultimately leads to enhancing innovation Understanding such unique approaches will enable companies universities and other actors to more effectively create innovative products and services and policy makers to effectively stimulate growth and innovation The fragmented distributed economies in Europe also put a strong focus on internationalisation including innovation management new product and service development even within the internally open market of the European Economic Area European Perspectives on Innovation Management will be of help to researchers managers entrepreneurs practitioners and students working on innovation management and practices embedded in national and regional innovation systems thus fostering a more innovative Europe Play. Learn. Innovate Henrik Sproedt, 2012 The chosen approach allows HS to move into truly original themes and conclusions In an argument for the importance of social dynamics as key for innovation he elegantly moves beyond the established norms in innovation literature HS skillfully manages to avoid a dogmatic critique of existing literature and instead points to the need for diverse and complementary approaches and the need to combine them through more comprehensive and multi faceted frameworks In the work the author demonstrates a comprehensive insight into theories of play and games and also contributes to knowledge by proposing a linking of different discourses that each in their way deal with social dynamics e g institutional theory social capital theory and the theory of complex responsive processes of relating The Assessment Committee **The Palgrave Handbook of Workplace Innovation** Adela McMurray, Nuttawuth Muenjohn, Chamindika Weerakoon, 2021-03-09 Innovation is a source of building long term sustainability If implemented successfully it can lead to superior organizational performance To be competitive companies and their leaders continuously strive to engage in new market spaces by developing and engaging in an innovative culture so as to differentiate themselves from their rivals With contributions from scholars and practitioners this Handbook provides evidence based case studies to identify workplace innovation practices in developed and developing countries Chapters are based on an organizational innovation framework and focuses on two major areas the determinants of innovation and the process and outcome elements It covers in depth cutting edge specialised topics such as frugal innovation innovation associated with leadership as well as numerous organisational contexts such as for profit and not for profit sectors and small medium and large organisations Essential reading for any student or scholar of innovation studies this handbook provides novel coverage of innovation practices linked to organizational variables such as culture ethics leadership and performance Judgment on the Front Line Chris DeRose, Noel M. Tichy, 2012-10-11 Front line

employees who deal directly with customers are the face of any organization. Not only do they have the most impact on how a brand is perceived but they are also the most valuable source of insight into what customers want and how to give it to them. Unfortunately, as management experts Chris DeRose and Noel M. Tichy explain, most organizations don't know how to evaluate the risk of giving employees more autonomy. Many of those who are willing to try haven't even invested resources in ensuring that once the shackles are off, front-line employees make good judgments. Tichy and DeRose offer powerful examples of front-line leadership such as how Zappos trusts its people to do anything in service of a customer, including providing free product or reimbursing for mistakes. How Mayo Clinic of Arizona enabled its nurses to challenge the hierarchy in order to improve patient care.
