Drowning by Accident Elizabeth Meinhard, 2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don't recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place

The Tide Hugh Aldersey-Williams, 2016-09-20 Superb A gently studious Bill Bryson crossed with an upbeat and relaxed WG Sebald James McConnachie Sunday Times UK Half of the world's population today lives in coastal regions lapped by tidal waters But the tide rises and falls according to rules that are a mystery to almost all of us In *The Tide* celebrated science writer Hugh Aldersey Williams weaves together centuries of scientific thinking with the literature and folklore the tide has inspired to explain the power and workings of this most remarkable force Here is the epic story of the long search to understand the tide from Aristotle to Galileo and Newton to classic literary portrayals of the tide from Shakespeare to Dickens Melville to Jules Verne Throughout Aldersey Williams whisks the reader along on his travels He visits the Bay of Fundy in Nova Scotia where the tides are the strongest in the world arctic Norway home of the raging tidal whirlpool known as the maelstrom and Venice to investigate efforts to defend the city against flooding caused by the famed acqua alta
