South African Air Force Application For 2015:

Military Psychology for Africa Gideon Van Dyk, 2016-03-17 Military Psychology for Africa is the first textbook of its kind from Africa. Selected authors with competent military psychology knowledge, skills, expertise, and experience each contributed a chapter to this unique book. The book empowers academics, students, and military fellows to apply this knowledge at academic institutions and military units during operations and in presenting short courses. The book will also equip soldiers with new knowledge for advancing peace on the continent and abroad. **Political Corruption in Africa** Inge

Amundsen, 2019. Analysing political corruption as a distinct but separate entity from bureaucratic corruption. This timely book separates these two very different social phenomena in a way that is often overlooked in contemporary studies. Chapters argue that political corruption includes two basic critical and related processes: extractive and power-preserving corruption.

Extremism Quassim Cassam, 2021-09-01. Extremism is one of the most charged and controversial issues of the twenty-first century. Despite myriad programs of deradicalization and prevention around the world, it remains an intractable and poorly understood problem. Yet it is also sometimes regarded as a positive force. According to Martin Luther King Jr, the question is not whether we will be extremists, but what kind of extremists we will be. In this much-needed and lucid book, Quassim Cassam identifies three types of extremism: ideological, methods, and psychological. He discusses the following fundamental topics and issues: What is extremism? What are the methods adopted by extremists? Is there an extremist mindset, and if so, what is it? What role do ideas of purity, victimhood, and humiliation play in understanding extremism? How does extremism differ from fanaticism and fundamentalism? How does one become an extremist, and how should we understand deradicalization? Throughout the book, Quassim Cassam uses many compelling examples ranging from the Khmer Rouge, the IRA, Al Qaeda, and Timothy McVeigh to Philip Roth's novel *American Pastoral* and counter-extremism programmes including the UK's Prevent strategy. Clear-headed and engaging, *Extremism: A Philosophical Analysis* is essential reading for anyone interested in this important topic, not only in philosophy but in related disciplines such as politics and international relations, conflict and terrorism studies, law, education, and religion. It will also be of great interest to policy makers and those engaged in understanding extremism at any level. **The Military Balance 2014** The International Institute for Strategic

Koo-Oshima, Edeltraud Guenther, 2022-05-26. The world is faced with a growing number of complex and interconnected challenges. Water is among the top 5 global risks in terms of impacts, which would be far-reaching beyond socio-economic

challenges impacting livelihoods and wellbeing of the people As freshwater resources and population densities are unevenly distributed across the world some regions and countries are already water scarce Water scarcity is expected to intensify in regions like the Middle East and North Africa MENA which has 6% of the global population but only 1% of the world s freshwater resources Climate change adds to this complexity as it is leading to rainfall uncertainty and extended droughts periods mostly in arid areas Increasing water scarcity is now recognized as a major cause of conflict social unrest and migration and at the same time water is increasingly considered as an instrument for international cooperation to achieve sustainable development Tapping and assessing sustainably every available option in water scarce areas is needed as pressure continues to build on limited water resources The stark fact is that conventional water provisioning approaches relying on snowfall rainfall and river runoff are not enough to meet growing freshwater demand in water scarce areas Water scarce countries need a radical re think of water resource planning and management that includes the creative exploitation of a growing set of viable but unconventional water resources for food production livelihoods ecosystems climate change adaption and sustainable development Unconventional water resources are generated as a by product of specialized processes need suitable pre use treatment require pertinent on farm management when used for irrigation or result from a special technology to collect access water

period of Cuban involvement in the long and tragic civil war that ruined Angola between 1975 and 1992 While the emphasis is upon the operations of the Angolan and Cuban air forces it also details how these impacted upon the ground operations of all parties This volume is richly illustrated with original photographs of the forces involved specially commissioned maps of the ground operations and a range of full color artworks
