South African Army Military Application Form 2014:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Civil Protection and Domestic Security in Contemporary Hybrid Warfare Wojciech Wróblewski, Michał Wiśniewski, Jędrzej Bieniasz, 2025-05-22 Civil Protection and Domestic Security in Contemporary Hybrid Warfare presents a comprehensive approach to civil protection and domestic security in contemporary hybrid armed conflict. Hybrid warfare encompasses a number of dimensions such as military, political, psychological, cognitive, space, social, economic, informational or technological. Current conflicts show that hybrid warfare, despite regional differences, is based on a common operational framework that combines conventional and unconventional tactics targeting not only military structures but also largely targeting civilians and societies. All this makes threats more diffuse, subtle and difficult to predict. They also often take the form of networked actions and have cascading effects in which they can produce complex secondary effects affecting a range of spheres of society and key infrastructure. In response to this spectrum of threats, individual states need to adapt their security and civil protection systems to the type of threat involved. However, most existing solutions are fragmented, resulting in a reduced ability to coordinate and adequately prepare civilians for hybrid threat conditions. Given these challenges, the book establishes a common language that helps shape coherent risk management and protective mechanisms in dealing with hybrid attacks. It also points in a new direction in ensuring the reliability of information provided to civilians, which is crucial in a hybrid war environment where disinformation is used as one of the main tools of destabilisation. Drawing on theoretical knowledge and practical experiences from around the world, the book provides tools to effectively respond to existing and future conflicts and hybrid wars. Above and beyond this, bridging the gap between concrete knowledge of hybrid warfare and operational needs, this book explores how public administrations, public services, NGOs, local communities and other actors

play a key role in protecting the population during such non traditional armed conflicts Civil Protection and Domestic Security in Contemporary Hybrid Warfare is a vital resource to government and civilian specialists responsible for population security and protection helping them and their civilian populations to strategise and oftentimes to individually mitigate the risk of loss of life or health as has been demonstrated in the Russia Ukraine conflict Warfare and Tracking in Africa, 1952-1990 Timothy J Stapleton,2015-10-06 During the decolonization wars in East and Southern Africa tracking became increasingly valuable as a military tactic Drawing on archival research and interviews Stapleton presents a comparative study of the role of tracking in insurgency and counter insurgency across Kenya Zimbabwe and Namibia **The Military Balance 2014** The International Institute for Strategic Studies (IISS),2021-12-24 The Military Balance 2014 contains region by region analysis of the major military and economic developments affecting defence and security policies and the trade in weapons and other military equipment Detailed entries describe the military capabilities of 171 countries displaying key equipment inventories and defence economics Comprehensive tables detail major training activities UN and non UN deployments and international comparisons of defence expenditure and military personnel *The World Factbook 2014- 15* United States.
