

Power	The Power port connects to the supplied 12VDC power adapter.
Ethernet	The Ethernet network port connects to Ethernet network devices, such as a switch or router that may or may not support Power over Ethernet (PoE).
Reset Button	There are two ways to reset the Access Point to the factory default configuration. Either press the Reset button, for approximately ten seconds, or restore the defaults using the Access Point's Web-based Utility.

IMPORTANT: Resetting the Access Point will erase all of your settings (including wireless security, IP address, and SSID) and replace them with the factory defaults. Do not reset the Access Point if you want to retain these settings.

Antennas and Positions

Antenna The Access Point has three non-detachable 2dBi omni-directional antennas. The three antennas have a base that can rotate 90 degrees when in the standing position. The three antennas will all be used to support 3X3 MIMO diversity in wireless-N mode.
