Food in Wartime Arthur Williams, When Britain declared war on Germany on September 3 1939 housewives across the nation faced an immediate and unprecedented challenge that would define their daily existence for the next six years The government having learned harsh lessons from the Great War s food shortages implemented a comprehensive rationing system that would transform every kitchen into a battlefield of ingenuity and endurance The rationing system began modestly in January 1940 with bacon butter and sugar but by 1943 had expanded to include virtually every foodstuff imaginable Each citizen received a ration book containing coupons that served as currency for survival The weekly allowance for an adult was meager by any standard four ounces of bacon or ham two ounces of butter two ounces of cheese four ounces of margarine two ounces of tea eight ounces of sugar and meat worth one shilling and ten pence Fresh eggs when available were limited to one per person per week though powdered eggs from America supplemented this sparse allocation The psychology of scarcity created a peculiar social dynamic where food became both a source of anxiety and a symbol of resilience British women who bore the primary responsibility for feeding their families developed an almost mystical relationship with their ration books These small booklets represented not just sustenance but dignity fairness and the promise that everyone would share equally in the nation s sacrifice Queue jumping became a social sin more serious than adultery and the sight of a shopkeeper s sold out sign could reduce a grown woman to tears

Evans unearths this neglected history of emergency public feeding and relates it to contemporary debates around food policy in times of crisis
