Stevens, 2020-11-26 This book takes the reader on a sensory ethnographic tour in Japan and describes the many ways sounds seep into everyday experiences So many ethnographies describe local worlds with a deep attention to what is seen and what people say but with a limited understanding of the broader sonic environments that enrich and inform everyday life Through a focus on sounds both real and imagined the volume employs a critical ear to engage with a range of sonically enriched encounters including crosswalk melodies in streetscapes announcements and jingles at train stations water features in gardens dosimeters in nuclear affected zones sounds of training in music and martial arts halls and celebrations under blossoming cherry trees The authors use various analytic frames to understand the communicative and symbolic aspects of sounds and to sense the layers of historical meaning embodied action and affect associated with sonic environments Key Concepts in Critical Cultural Studies Linda Steiner, Clifford Christians, 2010-10-01 This volume brings together sixteen essays on key and intersecting topics in critical cultural studies from major scholars in the field Taking into account the vicissitudes of political social and cultural issues the contributors engage deeply with the evolving understanding of critical concepts such as history

community culture identity politics ethics globalization and technology The essays address the extent to which these concepts have been useful to scholars policy makers and citizens as well as the ways they must be rethought and reconsidered if they are to continue to be viable Each essay considers what is known and understood about these concepts The essays give particular attention to how relevant ideas themes and terms were developed elaborated and deployed in the work of James W Carey the founding father of cultural studies in the United States The contributors map how these important concepts including Carey s own work with them have evolved over time and how these concepts intersect The result is a coherent volume that redefines the still emerging field of critical cultural studies Contributors are Stuart Allan Jack Zeljko Bratich Clifford Christians Norman Denzin Mark Fackler Robert Fortner Lawrence Grossberg Joli Jensen Steve Jones John Nerone Lana Rakow Quentin J Schultze Linda Steiner Angharad N Valdivia Catherine Warren Frederick Wasser and Barbie Zelizer

Moravian Soundscapes Sarah Justina Eyerly, 2020-05-05 In *Moravian Soundscapes* Sarah Eyerly contends that the study of sound is integral to understanding the interactions between German Moravian missionaries and Native communities in early Pennsylvania In the mid 18th century when the frontier between settler and Native communities was a shifting spatial and cultural borderland sound mattered People listened carefully to each other and the world around them In Moravian communities cultures of hearing and listening encompassed and also superseded musical traditions such as song and hymnody Complex biophonic geophonic and anthrophonic acoustic environments or soundscapes characterized daily life in Moravian settlements such as Bethlehem Nain Gnadentten and Friedenshtten Through detailed analyses and historically informed recreations of Moravian communal environmental and religious soundscapes and their attendant hymn traditions *Moravian Soundscapes* explores how sounds musical and nonmusical human and nonhuman shaped the Moravians religious culture Combined with access to an interactive website that immerses the reader in mid 18th century Pennsylvania and framed with an autobiographical narrative *Moravian Soundscapes* recovers the roles of sound and music in Moravian communities and provides a road map for similar studies of other places and religious traditions in the future

Acoustic Territories, Second Edition Brandon LaBelle, 2019-10-17 The revised edition of

Acoustic Territories Sound Culture and Everyday Life offers an expansive reading of auditory life. It provides a careful consideration of the performative dynamics inherent to sounding and listening and discusses how sound studies may illuminate understandings of contemporary society. Combining research on urbanism, popular culture, street life, and sonic technologies, Acoustic Territories opens up a range of critical perspectives, it challenges debates surrounding noise, pollution, and charts an acoustic politics of space by engaging auditory experience as found within particular cultural histories and related ideologies. Brandon LaBelle traces sound culture through a topographic structure from underground territories to the home and further into the rhythms and vibrations of streets and neighborhoods and finally to the sky itself as an arena of transmitted imaginaries. The new edition includes an additional global territory of the relational positioning of acoustics as a range of everyday practices that rework dominant tonalities. Questions of orientation and emplacement are critically raised, reframing listening as multi-modal and intrinsic to resistant socialities and what the author terms acts of compositioning. The book is fully updated to include new relevant research and references surfacing since 2010 as well as a new preface to the second edition. Acoustic Territories continues to uncover the embedded tensions and potentialities inherent to sound as it exists in the everyday spaces around us.

Halliwel's Film & Video Guide 2004 Leslie Halliwell, 2003. Clay's Handbook of Environmental Health Stephen Battersby, 2022-08-16. Since its first publication in 1933, Clay's Handbook of Environmental Health, under its different names, has provided a definitive guide for the environmental health practitioner (EHP) and an essential reference for the consultant and student. This 22nd edition continues with its more recent successful structure, reviewing the core principles, techniques, competencies, and skills required of an EHP and then outlining the specialist subjects without getting bogged down in a legalistic approach, seeking to broaden the content for a more global audience. This new edition seeks to educate the EHP on the public health impacts of global heating and the climate emergency and also reflects the COVID-19 pandemic as might be expected. Although seeking to have global appeal, the impact of the UK leaving the EU is also addressed. The book examines environmental health in different settings, including in the military, working in both conflict and natural disaster settings, and environmental health at sea and airports. In line with previous editions, case studies are used to illustrate how EH problems have been resolved. This new edition includes guidance on key issues in public and environmental health, including air pollution, contaminated land, housing, and health, noise, water, food safety, pests, and vector control, chemicals in the

environment and radiation as well as sustainability and public health and humanitarian crises This handbook aims to give a basic understanding of the philosophical basis of environmental health as well as the required technical aspects and an understanding of environmental health in different settings All chapters have sections on further reading and sources of information Clay s Handbook is essential reading for all practitioners students and researchers in environmental and public health wherever they are working

The Immersive Enclosure Paul Roquet,2022-05-24 Winner 2023 Lewis Mumford Award for Outstanding Scholarship in the Ecology of Technics Media Ecology Association Although virtual reality promises to immerse a person in another world its true power lies in its ability to sever a person s spatial situatedness in this one This is especially clear in Japan where the VR headset has been embraced as a way to block off existing social environments and reroute perception into more malleable virtual platforms Is immersion just another name for enclosure In this groundbreaking analysis of virtual reality Paul Roquet uncovers how the technology is reshaping the politics of labor gender home and nation He examines how VR in Japan diverged from American militarism and techno utopian visions and became a tool for renegotiating personal space Individuals turned to the VR headset to immerse themselves in three dimensional worlds drawn from manga video games and genre literature The Japanese government promised VR operated robots would enable a new era of remote work targeting those who could not otherwise leave home Middle aged men and corporate brands used VR to reimagine themselves through the virtual bodies of anime styled teenage girls At a time when digital platforms continue to encroach on everyday life The Immersive Enclosure takes a critical look at

these attempts to jettison existing social realities and offers a bold new approach for understanding the media environments to come
