Mohnhaupt,2020-11-10 The unbelievable true story of the Cold War s strangest proxy war fought between the zoos on either side of the Berlin Wall The liveliness of Mohnhaupt s storytelling and the wonderful eccentricity of his subject matter make this book well worth a read Star Tribune Minneapolis Living in West Berlin in the 1960s often felt like living in a zoo everyone packed together behind a wall with the world always watching On the other side of the Iron Curtain East Berlin and its zoo were spacious and lush socialist utopias where everything was perfectly planned and then rarely completed Berlin s two zoos in East and West quickly became symbols of the divided city s two halves So no one was terribly surprised when the head zookeepers on either side started an animal arms race rather than stockpiling nuclear warheads they competed to have the most pandas and hippos Soon state funds were being diverted toward giving these new animals lavish welcomes worthy of visiting dignitaries West German presidential candidates were talking about zoo policy on the campaign trail And eventually politicians on both side of the Wall became convinced that if their zoo proved to be inferior that would mean their country s whole ideology was too A quirky piece of Cold War history unlike anything you ve heard before *The Zookeepers War* is an epic tale of desperate rivalries human follies and an animal mad city in which zookeeping became a way of continuing politics by other means *The Novel and the Multispecies Soundscape* Ben De Bruyn,2020-05-23 The contemporary novel is not as silent as we tend to believe nor does it only attend to human plots and characters As this book shows writers in a range of subgenres have devoted considerable attention to the voices of nonhuman animals and to the histories and technologies of listening that shape twenty first century cultures and environments In doing so their multispecies novels illuminate the cultural meanings we attach to creatures like dogs frogs whales chimpanzees and Tasmanian tigers not to mention various bird species and even plants At the same time these stories explore the attitudes of distinct communities of human listeners ranging from vets and musicians to chimp caretakers and sonar technicians In highlighting animal sounds and their cultural meanings these novels by authors including Amitav Ghosh Julia Leigh Richard Powers Karen Joy Fowler Cormac McCarthy and Han Kang also enrich pressing debates about species extinction sound pollution nonhuman communication and human animal relations As we are violently reshaping the planet they invite us to reimagine our own humanity and animality and to rethink how we tell stories about multispecies contact zones and their complex soundscapes **Becoming a Marine Biologist** Virginia Morell,2019-04-02 A fascinating guide to a career in marine biology written by bestselling journalist Virginia Morell and based on the real life experiences of an expert in the field essential reading for someone considering a path to this profession For the last two decades Dr Robin Baird has spent two months out of each year aboard a twenty four foot Zodiac boat in the waters off the big island of Hawai i researching the

Snow,2023-01-22 Contemporary psychology believes that there exists an entity called the mind whose task is to deliberately control the body This entity is said to inhabit a dimension that s separate from the physical reality that s occupied by the brain Were this to be true then it might be possible for the mind to survive the death of its owner and be imported into another biological or mechanical body or be elevated into some metaphysical plane Topographic psychology dispenses with the concept of the mind Instead it asserts that the brain is a biological machine that uses an internal world model to transform sensation into movement This idea renders superfluous the concept of mindedness and enables human and animal behavior to be calibrated against evolution A world model largely consists of topographic maps Among these are a map of the proprietary territory of the brain s owner and a map of the owner s bones and muscles Although the territory exists in the outside world while the organs exist in the internal world of the body to the brain both maps represent pieces of the same reality Inhabiting the model s central axis is a neural artifact called the self object which serves within the owner s thinking as a proxy for the owner A transition from sensing to moving is called a decision Decisions that are made in the brain are facilitated by neural artifacts which are derived from sensory input that reside within the world model There are two fundamental kinds of artifacts objects and connections from which larger neural structures are assembled These include effectors which represent unitary actions by one party transactions which represent reciprocal actions between two parties polygon stacks which represent analogies inferences and stories a special polygon stack that represents the owner s autobiography pyramids which represent referents in the outside world and a special pyramid that represents the self object In order to promote its owner s survival a world model reacts to events in the external world by cycling the body between three physiological states There are three such states violence sex and work each of which reconfigures the body so that it can optimally respond to a threat or opportunity

The Master of Warlock: A Virginia War Story George Cary Eggleston,
The road was a winding twisting track as it threaded its way through a stretch of old field pines The land was nearly level at that point and quite unobstructed so that there was not the slightest reason that ordinary intelligence could discover for the roadway s devious wanderings It might just as well have run straight through the pine lands But in Virginia people were never in a hurry They had all of leisure that well settled and perfectly self satisfied ways of life could bring to a people whose chief concern it was to live uprightly and happily in that state of existence into which it had pleased God to call them What difference could it make to a people so minded whether the journey to the Court house the centre and seat of county activities of all kinds were a mile or two longer or shorter by reason of meaningless curves in the road or by reason of a lack of them Why should they bother to straighten out road windings that had the authority of long use for their being And why should the well fed negro drivers of family carriages shake themselves out of their customary and comfortable naps in order to drive more directly across the pine land when the horses if left to themselves would placidly follow the traditional track The crookedness of the road was a fact and Virginians of that time always accepted and respected facts to which they had

been long accustomed For that sufficient reason Baillie Pegram the young master of Warlock was not thinking of the road at all but accepting it as he did the greenery of the trees and the bursting of the buds as he jogged along at a dog trot on that fine April morning in the year of our Lord 1861 He was well mounted upon a mettlesome sorrel mare a mare with pronounced ideas of her own The young man had taught her to bend these somewhat to his will but her individuality was not yet so far subdued or suppressed as to lose itself in that of her master So she suddenly halted and vigorously snorted as she came within sight of the little bridge over Dogwood Branch where a horse and a young gentlewoman were obviously in trouble I name the horse and the girl in that ungallant reverse order because that was the order in which they revealed themselves to the mare and her master For the girl was on the farther side of the horse and stooping so that she could not be seen at a first glance As she heard approaching hoof beats she straightened herself into that dignity of demeanour which every young Virginia gentlewoman felt it to be her supreme duty in life to maintain under any and all circumstances War in Tim O'Brien's The Things They Carried Gary Wiener,2011-06-13 This did not happen is a common refrain throughout the stories in The Things They Carried Tim O'Brien's account of the Vietnam War purposely blurs the line between fact and fiction to get closer to the truth of what soldiers actually experienced This compelling volume explores the life of Tim O'Brien and his attempts to wrestle with the trauma and shame of war in The Things They Carried A collection of related essays explore topics such as the moral complexity of war writing as a path to spiritual redemption and the novel's portrayal of gender Contemporary perspectives on war such as the need to help soldiers suffering from PTSD and not repeating the mistakes of Vietnam are also presented **Proceedings of the United States Naval Institute** United States Naval Institute,2014-07 **Defeat and Triumph** Stephen Sussna,2008-02-28 Defeat and Triumph tells the story of the still controversial important dramatic but little known Allied invasion of the French Riviera on August 15 1944 This was known as Operation Anvil and later renamed Operation Dragoon Notwithstanding the massive opposition of Winston Churchill his military advisors and many notable American generals Dragoon happened After suffering four years of humiliating and devastating defeat French men and women were assisted by their American and British Allies and this invasion ensured World War II victory in Europe Defeat and Triumph The Story of a Controversial Allied Invasion and French Rebirth thoroughly analyzes the pros and cons of Dragoon The book provides a panoramic history of Operation Dragoon and related events in France Germany Great Britain the United States and the Mediterranean from 1940 1945 The author is in the unique position of having served on Day of Dragoon as Helmsman of LST 1012 Landing Ship Tank The LST 1012 participated in the most dangerous and tragic event of the invasion He has gathered and analyzed a treasure trove of previously unpublished American British French and German archival materials diaries letters periodical articles maps and interviews **ART OF MARVEL STUDIOS: ROAD TO AVENGERS INFINITY WAR** Various Authors,2018-09-24 The Avengers have come a long way since they first assembled to fight off an alien invasion The past five years have brought more and more

challenges and Earth's Mightiest Heroes have always risen to face them. But have they finally met their match in the intergalactic despot Thanos who seeks to inflict his twisted will on all of reality? Just in time for the highly anticipated event, this keepsake volume celebrates the characters and concepts that will converge in April 2018, collecting art, interviews, and photography from films leading up to Marvel's Avengers: Infinity War.

Big Miracle Tom Rose, 2024-09-04

Now a major motion picture starring Drew Barrymore, Ted Danson, Kristen Bell, Tim Blake Nelson, John Krasinski, and Vinessa Shaw, an account of the dramatic rescue of three gray whales trapped under the ice in Alaska in 1988. Set in Cold War era 1988, Big Miracle tells the real story behind the remarkable, bizarre, and oftentimes uproarious event that mesmerized the world for weeks. On October 7, an Inuit hunter near Barrow, Alaska, found three California Gray whales imprisoned in the Arctic ice. In the past, as was nature's way, trapped whales always died. Not this time. Tom Rose, who was covering the event for a Japanese TV station, compellingly describes how oil company executives, environmental activists, Inupiat people, small business people, and the U.S. military boldly worked together to rescue the whales. He also tells the stories of some of the more than 150 international journalists who brought the story to the world's attention. The rescue was followed by millions of people around the world as Ronald Reagan and Mikhail Gorbachev joined the forces of their two nations to help free the whales.
