Strategic Interaction Between Islamist Terror Groups Nina Ismael, 2020-11-10 This book applies game theory to the phenomenon of terrorism and investigates how the competition for support can influence the attack behavior of terror organizations In addition it examines the economics of terrorism The so called outbidding theory which has become increasingly popular within the field of terrorism research argues that terror groups vying for resources will engage in more and more violence to demonstrate their capabilities and commitment to their cause This book challenges the outbidding concept by providing a game theoretical analysis which shows that a contest between two terror groups can be interpreted as a race for support This interpretation may help explain why major attacks occur at all not as a result of outbidding but as a result of losing the race In addition the author shows that rivalry between terror groups does not necessarily lead to more attacks but can result in less terrorism due to an increased probability of attack failure induced by the race Lastly the model is applied to the rivalry between al Qaeda and Daesh elaborated on with empirical evidence Given its scope the book is a must read for researches and scholars working in the fields of economics politics the social sciences and military history as well as military and political decision makers and authorities working in the field of risk management

After Saddam Dina Badie, 2017-07-25 After Saddam American Foreign Policy and the Destruction of Secularism in the Middle East investigates the manner in which American foreign policy in Iraq artificially shifted the balance of power in the region and brought

religious identities to the foreground Deposing Saddam Hussein resulted in a new regional order that diminished the strength of secular nationalism elevated Iran and Saudi Arabia as regional rivals and by implication established a new ideological paradigm that privileged competing religious factions over secular ideals The trend first manifested itself in Iraq during the American occupation with Iranian backed Shiites fighting Saudi supported Sunnis A similar dynamic is evident in current regional wars in Syria and Yemen By elevating particular groups through rhetorical financial and military support civil conflicts in the Middle East reflect the ideologies behind the Saudi Iranian rivalry This book therefore looks beyond popular narratives of intractable long standing Sunni Shia conflict to explain the source of current sectarian tension as a product of balance of power dynamics It also helps to explain the fracturing of the region that created a ripe environment for groups like the Islamic State to capitalize on sectarian grievances This book relies and builds on balance of power theorizing by looking at the way that traditional competition for power between states and nonstate actors shapes ideological competition For example during the Cold War the two major world powers the U S and the Soviet Union helped to shape international conflicts so that the narrative of capitalism vs communism played a prominent role in civil and international conflicts such as in Korea Nicaragua or Angola By meddling in the internal affairs of states arming rebel groups and lending support to competing factions the U S and U S S R shaped not only outcomes but also the ideas underpinning conflicts Today a similar dynamic can be discerned in the Middle East
