David Stensel, Metcalf & Eddy, 2003 *Handbook of Nature-Based Drought Solutions* Saeid Eslamian, Faezeh Eslamian, 2025-06-27

Handbook of Nature Based Drought Solutions covers the latest research on successful sustainable solutions for the efficient water resources management to overcome the drought and water scarcity problems. The book centers around the realms of drought modeling, green infrastructure planning, and the utilization of remote sensing to evaluate, dissect, and oversee drought occurrences. It delves into subjects such as risk mitigation, strategic planning, policy considerations, and the ecological restoration of degraded lands after drought. The use of case studies and novel methodologies, including soft computing technique application, will help the reader gain a deeper knowledge in understanding, predicting, and mitigating hydrometeorological hazards. Offers fundamental information on nature-based techniques to drought management. Includes case studies and methods for the successful implementation of ecological restoration of degraded lands. Covers both traditional and novel techniques for the efficient water resources management to overcome drought and water scarcity problems.

Wastewater Pay Drechsel, Manzoor Qadir, Dennis Wichelns, 2015-03-11. The book provides a timely analysis in support of a paradigm shift in the field of wastewater management from treatment for disposal to treatment for reuse by offering a variety of value propositions for water, nutrient, and energy recovery, which can support cost savings, cost recovery, and profits in a sector that traditionally relies on public funding. The book provides new insights into the economics of wastewater use applicable to developed and developing countries striving to transform wastewater from an unpleasant liability to a valuable asset and recasting urbanization from a daunting challenge into a resource recovery opportunity. It requires business thinking to transform septage and sewage into valuable products. A must read for water scholars, policy makers, practitioners, and entrepreneurs. Guy Hutton, Senior Economist, Water and Sanitation Program, Water Global Practice, World Bank. This book provides compelling evidence and real solutions for the new resource from waste approach that is transforming sanitation, boosting livelihoods, and strengthening urban resilience. Christopher Scott, Professor and Distinguished Scholar, University of Arizona. This book shows how innovative business thinking and partnerships around resource recovery and reuse fit well within an inclusive green economy and climate change adaptation and mitigation strategies. Aki A. Bahri, Coordinator of the African Water Facility, Tunisia, and award-winning researcher.
