world leaders recognized that the world is on a collision course Max Neef and committed to 17 Sustainable Development Goals SDGs Many conferences and high level meetings have been held since then and one of the most frequently discussed topics is how to finance these goals There is a widespread belief that coming up with more money for sustainable development will do the trick Usually the discussions focus on finding additional financial resources in order to achieve the goals faster In this book it is argued that not only is more money needed but it needs to be a different kind of money The book demonstrates that ALL but one of the SDGs are directly linked to our monetary system which being completely unnatural can be seen as the most important but at the same time least recognized reason for market failure Many people think we just need to do more faster better Very few say that we have done things fundamentally wrong and that the institutions and values which motivated us to do those things need to be changed It will be concluded that only if we change our unnatural design of money to a more natural one will we be able to reach these goals **Solutions Manual for**
