Ciottone's Disaster Medicine - E-Book Gregory R. Ciottone, 2023-03-07 While medical specialists in disaster mitigation preparedness and response are needed worldwide the initial phase of disaster response is almost entirely dependent upon local resources making it essential that all healthcare personnel have a working knowledge of the field and stand ready to integrate into the response system Ciottone's Disaster Medicine 3rd Edition is the most comprehensive reference available to help accomplish these goals in every community It thoroughly covers isolated domestic events as well as global disasters and humanitarian crises Dr Gregory Ciottone and more than 200 worldwide authorities share their knowledge and expertise on the preparation assessment and management of both natural and man made disasters including lessons learned by the responders to contemporary disasters such as the COVID 19 pandemic Australian and western U S wildfires European heatwaves the Beirut explosion recent hurricanes and typhoons and the global refugee crisis Part 1 offers an A to Z resource for every aspect of disaster medicine and management while Part 2 features an exhaustive compilation of every conceivable disaster event organized to facilitate quick reference in a real time setting Covers basic concepts such as identification of risks organizational preparedness equipment planning disaster education and training and more advanced concepts such as disaster risk reduction health in complex emergencies building local disaster resiliency psychological impact of disasters on children and more Contains new decision trees throughout that help guide you through the decision making process in difficult situations Uses an easy to follow templated approach to historical perspectives overviews of current practice including pre incident and post incident actions medical treatment of casualties and potential pitfalls Includes updated sections on man made disasters including mass casualties active shooter situations integrated response to terrorist attacks and chemical biological radiological nuclear high yield explosives disasters Discusses the latest technologies such as the use of mobile disaster applications drone response systems and virtual reality simulation training Features thoroughly updated information on crisis leadership practical applications of disaster epidemiology disaster and climate change and the integration of non government agencies NGOs in disaster response a critical topic for those responding to humanitarian needs overseas Includes new chapters on Pandemic Preparedness and Response Disaster Medicine in a Changing Climate Disaster Response in Asia Building Local Capacity and Disaster Resiliency Civilian Military Coordination in Disaster Response Medical Simulation in Disaster Preparedness Disaster Nursing Crisis Meta Leadership Palliative Care in Disasters Counter Terrorism Medicine SARS CoV COVID 19 and SARS and Disasters in Space Travel An eBook version is included with purchase The eBook allows you to access all of the text figures and references with the ability to search customize your content make notes and highlights and have content read aloud

Hayes' Principles and Methods of Toxicology A.

Wallace Hayes, Tetyana Kobets, 2023-07-03 Hayes Principles and Methods of Toxicology has long been established as a reliable and informative reference for the concepts, methodologies and assessments integral to toxicology. The new edition contains updated and new chapters with the addition of new authors while maintaining the same high standards that have made this book a benchmark resource in the field. Key Features: The comprehensive yet concise coverage of various aspects of fundamental and applied toxicology makes this book a valuable resource for educators, students and professionals. Questions provided at the end of each chapter allow readers to test their knowledge and understanding of the material covered. All chapters have been updated and over 60 new authors have been added to reflect the dynamic nature of toxicological sciences. New topics in this edition include Safety Assessment of Cosmetics and Personal Care Products, The Importance of the Dose Rate Response, Novel Approaches and Alternative Models, Epigenetic Toxicology and an Expanded Glossary. The volume is divided into 4 major sections addressing fundamental principles of toxicology: Section I Principles of Toxicology, major classes of established chemical hazards; Section II Agents, current methods used for the assessment of various endpoints indicative of chemical toxicity; Section III Methods as well as toxicology of specific target systems and organs; Section IV Organ and System Specific Toxicology. This volume will be a valuable tool for the audience that wishes to broaden their understanding of hazards and mechanisms of toxicity and to stay on top of the emerging methods and concepts of the rapidly advancing field of toxicology and risk assessment.

Seismic Design, Assessment and Retrofitting of Concrete Buildings Michael N. Fardis, 2009-07-25 Reflecting the historic first European seismic code, this professional book focuses on seismic design, assessment and retrofitting of concrete buildings with thorough reference to and application of EN Eurocode 8. Following the publication of EN Eurocode 8 in 2004, 05, 30 countries are now introducing this European standard for seismic design for application in parallel with existing national standards till March 2010 and exclusively after that. Eurocode 8 is also expected to influence standards in countries outside Europe or at the least to be applied there for important facilities. Owing to the increasing awareness of the threat posed by existing buildings, substandard and deficient buildings and the lack of national or international standards for assessment and retrofitting, its impact in that field is expected to be major. Written by the lead person in the development of the EN Eurocode 8, the present handbook explains the principles and rationale of seismic design according to modern codes and provides thorough guidance for the conceptual seismic design of concrete buildings and their foundations. It examines the experimental behaviour of concrete members under cyclic loading and modelling for design and analysis purposes; it develops the essentials of linear or nonlinear seismic analysis for the purposes of design, assessment and retrofitting, especially using Eurocode 8 and gives detailed guidance for modelling concrete buildings at the member and at the system level. Moreover, readers gain access to overviews of provisions of Eurocode 8 plus an understanding for them on the basis of the simple models of the element behaviour presented in the book. Also examined are the modern trends in performance and displacement based seismic assessment of existing buildings.

comparing the relevant provisions of Eurocode 8 with those of new US prestandards and details of the most common and popular seismic retrofitting techniques for concrete buildings and guidance for retrofitting strategies at the system level Comprehensive walk through examples of detailed design elucidate the application of Eurocode 8 to common situations in practical design Examples and case studies of seismic assessment and retrofitting of a few real buildings are also presented From the reviews This is a massive book that has no equal in the published literature as far as the reviewer knows It is dense and comprehensive and leaves nothing to chance It is certainly taxing on the reader and the potential user but without it use of Eurocode 8 will be that much more difficult In short this is a must read book for researchers and practitioners in Europe and of use to readers outside of Europe too This book will remain an indispensable backup to Eurocode 8 and its existing Designers Guide to EN 1998 1 and EN 1998 5 published in 2005 for many years to come Congratulations to the author for a very well planned scope and contents and for a flawless execution of the plan AMR S ELNASHAI The book is an impressive source of information to understand the response of reinforced concrete buildings under seismic loads with the ultimate goal of presenting and explaining the state of the art of seismic design Underlying the contents of the book is the in depth knowledge of the author in this field and in particular his extremely important contribution to the development of the European Design Standard EN 1998 Eurocode 8 Design of structures for earthquake resistance However although Eurocode 8 is at the core of the book many comparisons are made to other design practices namely from the US and from Japan thus enriching the contents and interest of the book EDUARDO C CARVALHO
