careers related to policing courts corrections and private security The Privatization of Policing Brian Forst, Peter K. Manning, 1999-06-10 The increasing reliance on private security services raises questions about the effects of privatization on the quality of public police forces particularly in high crime low income areas In an effective pro and con format two experts on policing offer two strikingly different perspectives on this trend towards privatization In the process they provide an unusually thoughtful discussion of the origins of both the public police and the private security sectors the forces behind the recent growth of private security operations and the risks to public safety posed by privatization In his critique of privatization Peter K Manning focuses on issues of free market theory and management practices such as Total Quality Management that he believes are harmful to the traditional police mandate to control crime He questions the appropriateness of strategies that emphasize service to consumers For Brian Forst the free market paradigm and economic incentives do not carry the same stigma He argues that neither public nor private policing should have a monopoly on law enforcement activities and he predicts an even more varied mix of public and private police activities than are currently available Following the two main sections of the book each author assesses the other's contribution reflecting on not just their points of departure but also on the areas in which they agree The breadth and depth of the discussion makes this book essential for both scholars and practitioners interested in policing generally and privatization in particular Researching Non-state Actors in International Security Andreas Kruck, Andrea Schneiker, 2017-04-28 This volume provides researchers and students with a discussion of a broad range of methods and their practical application to the study of non state actors in international security All researchers face the same challenge not only must they identify a suitable method for analysing their research question they must also apply it This volume prepares students and scholars for the key challenges they confront when using social science methods in their own research To bridge the gap between knowing methods and actually employing them the book not only introduces a broad range of interpretive and explanatory methods it also discusses their practical application Contributors reflect on how they have used methods or combinations of methods such as narrative analysis interviews qualitative comparative analysis QCA case studies experiments or participant observation in their own research on non state actors in international security Moreover experts on the relevant methods discuss these applications as well as the merits and limitations of the various methods in use Research on non state actors in international security provides ample challenges and opportunities to probe different methodological approaches It is thus particularly instructive for students and scholars seeking insights on how to best use particular methods for their research projects in International Relations IR security studies and neighbouring disciplines It also offers an innovative laboratory for developing new research techniques and engaging in unconventional combinations of methods This book will be of much interest to students of non state security actors such as private military and security companies research methods security studies and International Relations in general The Open Access version of this book available at <https://www.routledge.com> Researching Non state
