Factoring Special Products

Factor the following special products. The first two expressions are $a^2 - b^2$ and $a^2 + b^2$ and the third is $a^2 - b^2$. The following pattern should help to factor the expressions.

Difference of Squares	$a^2 - b^2 = (a + b)(a - b)$
-----------------------	------------------------------

Example 1: Factor the difference of squares.

a. $a^2 - b^2$

$a^2 - b^2$

$a^2 - b^2$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2$

Example 2: Factor the difference of squares.

a. $a^2 - b^2$

$a^2 - b^2$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

$a^2 - b^2 = (a + b)(a - b)$

b. $a^2 - b^2$

$a^2 - b^2$

$a^2 - b^2 = (a + b)(a - b)$

Using Design Research and History to Tackle a Fundamental Problem with School Algebra Sinan Kanbir,M. A. (Ken) Clements,Nerida F. Ellerton,2017-10-28 In this well illustrated book the authors Sinan Kanbir Ken Clements and Nerida Ellerton tackle a persistent and universal problem in school mathematics why do so many middle school and secondary school students find it difficult to learn algebra well What makes the book important are the unique features which comprise the design research approach that the authors adopted in seeking a solution to the problem The first unique feature is that the authors offer an overview of the history of school algebra Despite the fact that algebra has been an important component of secondary school mathematics for more than three centuries there has never been a comprehensive historical analysis of factors influencing the teaching and learning of that component The authors identify through historical analysis six purposes of school algebra a algebra as a body of knowledge essential to higher mathematical and scientific studies b algebra as generalized arithmetic c algebra as a prerequisite for entry to higher studies d algebra as offering a language and set of procedures for modeling real life problems e algebra as an aid to describing structural properties in elementary mathematics and f algebra as a study of variables They also raise the question whether school algebra represents a unidimensional trait Kanbir Clements and Ellerton offer an unusual hybrid theoretical framework for their intervention study by which seventh grade students significantly improved their elementary algebra knowledge and skills Their theoretical frame combined Charles Sanders Peirce s triadic signifier interpretant signified theory which is in the realm of semiotics with Johann Friedrich Herbart s theory of apperception and Ken Clements and Gina Del Campo s theory relating to the need to expand modes of communications in mathematics classrooms so that students engage in receptive and expressive modes Practicing classroom teachers formed part of the research team This book appears in Springer s series on the History of Mathematics Education Not only does it include an important analysis of the history of school algebra but it also adopts a theoretical frame which relies more on theories from the past than on contemporary theories in the field of mathematics education The results of the well designed classroom intervention are sufficiently impressive that the study might have created and illuminated a

Evidence-Based Interventions for Students with Learning and Behavioral Challenges Richard J. Morris,Nancy Mather,2008-01-14 This book assembles into one volume summaries of school based intervention research that relates to those who deal on a regular basis with the growing body of students having high incidence learning disabilities and or behavior disorders special educators school psychologists and clinical child psychologists Chapter authors begin with an overview of their topic followed by a brief section on historical perspectives before moving on to the main section a critical discussion of empirically based intervention procedures In those instances where evidence based prescriptions can legitimately be made authors discuss best practices and the conditions e g classroom environment teacher expertise under which these practices are most effective A final section deals with policy issues **Bringing Out the Algebraic Character of Arithmetic** Analúcia D. Schliemann,David W. Carraher,Bárbara M. Brizuela,2006-08-29 Bringing Out the Algebraic Character of Arithmetic contributes to a growing body of research relevant to efforts to make algebra an integral part of early mathematics instruction an area of studies that has come to be known as Early Algebra It provides both a rationale for promoting algebraic reasoning in the elementary school curriculum and empirical data to support it The authors regard Early Algebra not as accelerated instruction but as an approach to existing topics in the early mathematics curriculum that highlights their algebraic character Each chapter shows young learners engaged in mathematics tasks where there has been a shift away from computations on specific amounts toward thinking about relations and functional dependencies The authors show how young learners attempt to work with mathematical generalizations before they have learned formal algebraic notation The book suitable as a text in undergraduate or graduate mathematics education courses includes downloadable resources with additional text and video footage on how students reason about addition and subtraction as functions on how students understand multiplication when it is presented as a function and on how children use notations in algebraic problems involving fractions These three videopapers written text with embedded video footage present relevant discussions that help identify students mathematical reasoning The printed text in the book includes transcriptions of the video episodes in the CD ROM Bringing Out the Algebraic Character of Arithmetic is aimed at researchers practitioners curriculum developers policy makers and graduate students across the mathematics education community who wish to understand how young learners deal with algebra before they have learned about algebraic notation Conducting Educational Research Daniel J. Boudah,2019-08-14 Designed to be used during the research process Conducting Educational Research Guide to Completing a Thesis Dissertation or Action Research Project Second Edition walks readers through each step of a research project or thesis including developing a research question performing a literature search developing a research plan collecting and analyzing data drawing conclusions and sharing the conclusions with others Throughout the book Daniel J Boudah covers all types of research including experimental descriptive qualitative group designs and single

subject designs and helps readers link research questions to designs designs to data sources and data sources to appropriate analyses Each chapter includes activities and exercises to ensure the researcher is asking the right questions and producing a quality project
