Stress Concentrators in Continuous Deformable Bodies Vahram N. Hakobyan,2022-12-01 This book is devoted to the study of topical issues of the simultaneous interaction of various types of stress concentrators with massive homogeneous and composite deformable bodies A wide class of new contact and mixed problems is considered and their closed or effective solutions are constructed The features of the dynamic mutual influence of various stress concentrators in some problems of forced vibrations of composite massive bodies are also studied Subject Guide to Books in Print ,1993

Mechanical Systems Bernard Brogliato, 2008-01-11 This volume constitutes an advanced introduction to the field of analysis modeling and numerical simulation of rigid body mechanical systems with unilateral constraints The topics include Moreau's sweeping process the numerical analysis of nonsmooth multibody systems with friction the study of energetical restitution coefficients for elasto plastic models the study of stability and bifurcation in systems with impacts and the development of a multiple impact rule for Newton's cradle and the simple rocking model Combining pedagogical aspects with innovative approaches this book will not only be of interest to researchers working actively in the field but also to graduate students wishing to get acquainted with this field of research through lectures written at a level also accessible to nonspecialists

American Book Publishing Record, 1970 **Contact Mechanics** M. Jean, J.J. Moreau, M. Raous, 2012-12-06 This proceedings volume contains 66 papers presented at the second Contact Mechanics International Symposium held in Carry Le Rouet France from September 19th to 23rd 1994 attended by 110 participants from 17 countries This symposium was the continuation of the first CMIS held in 1992 in Lausanne of the Symposium Euromech 273 Unilateral Contact and Dry Friction held in 1990 in La Grande Motte France and of the series of Meetings on Unilateral Problems in Structural Analysis organized in Italy every other year during the eighties The primary purpose of the symposium was to bring specialists of contact mechanics together in order to draw a representative picture of the state of the art and to identify new trends and new features in the field In view of the contributions made one may assert that the mechanics of contact and friction has now reached a stage where the foundations are clear both from the mathematical and from the computational standpoints Some of the difficulties met may be identified by saying that frictional contact is governed by resistance laws that are non smooth and whose flow rule is not associated with the yield criterion through the traditional normality property Soviet Aeronautics and Astronautics, 1986 Scientific and Technical Aerospace Reports, 1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database
