what really lurks between those sesame seed buns Published in 2001 Eric Schlosser's *Fast Food Nation: The Dark Side of the All American Meal* explores the dark underbelly of fast food production in the United States An award winning journalist and contributor to *Atlantic Monthly* Schlosser developed the book from a series of articles for *Rolling Stone* magazine *Rolling Stone* asked Schlosser to find out where fast food came from As someone who enjoyed indulging in fries and hamburgers Schlosser was initially reluctant to take on the assignment As he began to research the history and formation of the fast food industry he became increasingly curious about how the industry gained power and influence on America's agricultural landscape and food culture With over 50 pages of research notes included at the end of the book the author defends his points with thorough analysis from various legal investigations interviews and journal articles Schlosser artfully weaves sarcasm with gritty investigative journalism to demonstrate how corporations and greed have corrupted the food system in America Schlosser's book was a *New York Times* bestseller for over two years and has sold over 1.4 million print copies In 2006 *Fast Food Nation* became a fictionalized film directed by Richard Linklater which was featured at the Cannes Film Festival However the book and film were not met without criticism from trade industry producers of beef potatoes and restaurant chains like McDonald's The *Wall Street Journal* reported in 2006 that various organizations were trying to create campaigns against Schlosser's allegations in the book that fast food consumption contributes to obesity and fostered corruption in the nation's agricultural system EXCERPT FROM THE BOOK The author playfully muses that should America be attacked in the future Cheyenne Mountain may be the only place with artifacts of our civilization Burger King wrappers hardened crusts of Cheesy Bread Barbeque Wings bones and the red white and blue of a Domino's pizza box What started as a small food stand in southern California has now spread all over the nation Schlosser says fast food has infiltrated every nook and cranny of American society Shockingly Americans spend more today on fast food than higher education computers or new cars Schlosser estimates On any given day in the United States about one quarter of the country's adult population visits a fast food restaurant The author argues that the powerful rise of fast food industry happened quickly and not only transformed the American diet but also our landscape economy workforce and popular culture Importantly Schlosser draws parallels between Cheyenne Mountain and today's fast food industry

A. Hamid, 2009-09-22 Today s children may well become the first generation of Americans whose life expectancy will be shorter than that of their parents The culprit public health experts agree is obesity and its associated health problems Heretofore the strategy to slow obesity s galloping pace has been driven by what the philosopher Karl Popper calls the bucket theory of the mind When minds are seen as containers and public understanding is viewed as being a function of how many scientific facts are known the focus is naturally on how many scientific facts public minds contain But the strategy has not worked Despite all the diet books the wide availability of reduced calorie and reduced fat foods and the broad publicity about the obesity problem America s waistline continues to expand It will take more than food pyramid images or a new nutritional guideline to stem obesity s escalation Albert Einstein once observed that the significant problems we face cannot be solved at the same level of thinking we were at when we created them and that we would have to shift to a new level a deeper level of thinking to solve them This book argues for and presents a different perspective for thinking about and addressing the obesity problem a systems thinking perspective While already commonplace in engineering and in business the use of systems thinking in personal health is less widely adopted Yet this is precisely the setting where complexities are most problematic and where the stakes are highest **Master Class: Living Longer, Stronger, and Happier** Peter Spiers, 2012-06-26 They can be seen in communities throughout the country those amazingly hale hearty and happy older folks who are having fun have a million friends are sharp as tacks and look like they ll live forever Their secret
