Exercise 3a

Jack, 15: I spend time with my family most evenings. At the weekend, I prefer to hang out with my friends at the park or in the playground in the local woods. If it rains, I like to go to see a film with my friends.

Monica, 18: I belong to a chess club which meets twice a month, and once a year we go camping. It's the highlight of my summer! We stay in tents on a lovely camp site and have picnics and barbecues. In the evenings, we organize quizzes and play cards. And we also play a lot of chess, of course!

Amrita, 12: My older sisters spend a lot of time with their friends in the local shopping centre, but I'm not allowed to go out without an adult yet. I can still chat to my friends all the time though, by phone, email or text message.

Exercise 3b

Suggested answers:

- 1 Why are Ben, Rory and Carlos mentioned in the article?
- 2 Which of the following best describes Ben?
- 3 What do we know about the lake that Rory visits?
- 4 Carlos mentions that he is left-handed because ...
- 5 The answers to the recent research and the answers from the readers...

Exercise 4

- i The correct answer is b – It is true what is said in d: they are teenage boys, but they are mentioned because what they said about themselves is part of the article (b). c says that they read magazines, but we only know that they are readers of the magazine that the text was in, not that they read magazines in general, and in any case this would not be enough of a reason for them to appear in this magazine. a is not correct: they say why they value friendship, but we don't know if this is true about all teenagers.

Methodological Cognitivism Riccardo Viale, 2012-05-24 This book deals with the cognitive foundation of the theory of social action The social sciences are still guided by models of social action far from the empirical reality of the psychology of action While economics seems to have made greater progress in accepting the changes to the theory of action derived from cognitive science see for example the 2002 Nobel prize for economics awarded to Daniel Kahneman sociology is still being oriented on the dualism of hermeneutics vs structuralism which leaves very little room for a cognitive theory of social action The unique features of the book are its combination of epistemology philosophy of mind and cognitive science in order to renew and overcome the limits of the current methodologies of social science and in particular methodological individualism Methodological cognitivism is proposed as an alternative to the holistic character of structuralism to the intentionalist and rationalist features of methodological individualism and to the relativistic character of hermeneutics and ethnomethodology

The Solution to an Injustice in Trials Sinclair Banks, 2019-03-01 This 664 page law and logic book contains the most comprehensive and detailed description of the composition of argument ad hominem ever published revealing this form of argument to be a far broader fallacy than was previously known Like perjury argument ad hominem can deceive juries and cause unjust trial verdicts There is fortunately already a criminal law against perjury but unfortunately there is currently no law that expressly prohibits argument ad hominem in trials The book includes the text of a proposed criminal law that expressly prohibits argument ad hominem in trials and shows the necessity of such a law to counter effectively this quite common form of injustice in jury trials For more description of the book's content and to view the dust jacket please visit sinclairbanks.com author **Encyclopedia of Science and Technology Communication** Susanna Hornig

Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer poorer educated less educated publics The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind This is taking place in a globalizing economy and society that further complicates the division between information haves and have nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences Journalism about science and technology must fill this gap yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments Scientist aided by public relations and public information professionals must get their stories out not only to other scientists but also to broader public audiences Funding agencies increasingly expect their grantees to engage in outreach and education and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer supported university based research Science communication often in new forms must expand to meet all these needs Providing a comprehensive introduction to students professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each For this reason science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower division courses Even so those entering the field rarely will have a comprehensive background in both science and communication studies This circumstance underscores the importance of compiling useful reference materials The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators including theoretical material and background on recent controversies and key institutional actors and sources Science communicators need to understand more than how to interpret scientific facts and conclusions they need to understand basic elements of the politics sociology and philosophy of science as well as relevant media and communication theory principles of risk communication new trends and how to evaluate the effectiveness of science communication programmes to mention just a few of the major challenges This work will help to develop and enhance such understanding as it addresses these challenges and more Topics covered
