Paradigm Shifts in 21st Century Teaching and Learning Orakcı, Şenol, 2020-04-24 One of the most important transformations in the world today is the adaptation to education and teaching methods that must be made to enhance the learning experience for Millennial and Generation Z students The system in which the student is passive and the teacher is

active is no longer the most effective form of education. Additionally, with the increased availability to information, knowledge transfer is no longer done solely by the teacher. Educators need to become moderators in order to promote effective teaching practices. *Paradigm Shifts in 21st Century Teaching and Learning* is an essential scholarly publication that examines new approaches to learning and their application in the teaching/learning process. Featuring a wide range of topics such as game-based learning, curriculum design, and sustainability, this book is ideal for teachers, curriculum developers, instructional designers, researchers, education professionals, administrators, academicians, educational policymakers, and students.
