**Understanding Asexuality** Anthony F. Bogaert, 2015-03-06 Asexuality can be defined as an enduring lack of sexual attraction Thus asexual individuals do not find and perhaps never have others sexually appealing Some consider asexuality as a fourth category of sexual orientation distinct from heterosexuality homosexuality or bisexuality However there is also recent evidence that the label asexual may be used in a broader way than merely as a lack of sexual attraction People who

say they have sexual attraction to others but indicate little or no desire for sexual activity are also self identifying as asexual Distinct from celibacy which refers to sexual abstinence by choice where sexual attraction and desire may still be present asexuality is experienced by those having a lack of sexual attraction or a lack of sexual desire More and more those who identify as asexual are coming out joining up and forging a common identity The time is right for a better understanding of this sexual orientation written by an expert in the field who has conducted studies on asexuality and who has provided important contributions to understanding asexuality This timely resource will be one of the first books written on the topic for general readers and the first to look at the historical biological and social aspects of asexuality It includes firsthand accounts throughout from people who identify as asexual The study of asexuality as it contrasts so clearly with sexuality also holds up a lens and reveals clues to the mystery of sexuality
